	Explore feasibility of making the temporary diversions set up to aid the gas works on Hornsey Park Road (opposite Mary Newner Way) permanent to aid congestion	<p>It is unlikely that a one-way system will be considered in Hornsey Park Road as this could potentially lead to an increase in traffic speeds. Surrounding roads would also see a rise in traffic volume. Current streetscape design discourages one way roads as they often serve to bisect communities, raise safety concerns through traffic speeds and volume and are inconvenient to those that live along them. To this end, many one way streets are now being removed.</p> <p>The main purpose of the Mary Neuner Way diversion was to enable the regeneration of the Haringey Heartlands site, which may have benefits in terms of relieving traffic on Hornsey Park Road. However, it was not built as a bypass for Hornsey Park Road and was not designed to cater for the traffic on Hornsey Park Road as well as the traffic from the redevelopment of Haringey Heartlands.</p>	Tony Kennedy – Sustainable Transport Manager			Nothing further to report

10. Improving air quality		<p>The Wood Green area is one of nine areas in Haringey identified by TfL as an "NO2 Focus Area". In addition a modelling report carried out in 2009 for Haringey Council identified the Wood Green area as a 'hotspot' area for pollutants of NO2 and PM10. Particles or particulate matter (PM) are tiny bits of solids or liquids suspended in the air. PM10 are particles smaller than about 10 micrometers that can settle in the airway and deep in the lungs and cause health problems. These hotspots / focus areas are representative of relevant exposure, locations at which there may be a risk of exceeding the Government's hourly and annual objectives.</p> <p>The main source of air pollution in Haringey is from road vehicles and domestic gas, the emissions being nitrogen dioxide and PM10. Although many sources of emissions contribute to air pollution, in the immediate vicinity of roads, road traffic emissions sources dominate the pollution profile.</p> <p>Air Pollution requirements in the Wood Green area:</p> <ul style="list-style-type: none"> Major developments in the Wood green area will require an air quality assessment.
