Tottenham Strategic Regeneration Framework - Delivery Plan

Introduction

The Tottenham Strategic Regeneration Framework (SRF) approved by Haringey Council's Cabinet on 18 March 2014 sets out seven **strategies for success** that will guide the Tottenham Regeneration Programme:

- 1. World-class education and training including new schools, better access to apprenticeships and more Tottenham young people attending university;
- 2. Improved access to jobs and business opportunities attracting major investment and encouraging local business growth to boost employment;
- 3. A different kind of housing market improving existing homes and building new, high-quality homes to meet demand at a range of prices and tenures;
- **4.** A fully connected community with even better transport links continuing to improve rail, Tube and bus links, including making the case for Crossrail 2, as well as opening up Tottenham to more walking and cycling routes;
- 5. A strong and healthy community improved healthcare facilities, reduced crime and strong social networks for young people;
- 6. Great places putting Tottenham's character and heritage centre-stage while creating better public spaces to meet, shop and have fun;
- 7. The right investment and quality development building partnerships and securing money to achieve these priorities with a focus on high quality design.

These strategies will support the delivery of the **future vision for Tottenham**:

By the age of twenty, a child born in Tottenham today will have a quality of life and access to the same level of opportunity that is at least equal to the best in London.

The SRF Delivery Plan will focus on the following **four priorities** in the short to medium term to deliver the aspirations within the SRF and those gathered from the local community as part of the 'Tottenham's Future' engagement programme:

- 1. People: To deliver improved access to jobs and business opportunities; world-class education and training; and a strong and healthy community;
- 2. Place: Better caring for the place and delivering improved public realm in all of the local centres that comprise Tottenham;
- 3. North Tottenham including High Road West, a new stadium/leisure destination and a comprehensive estate regeneration and housing renewal programme; and

4. Tottenham Hale: a key area of opportunity in South Tottenham, building on the delivery of a new station and a range of mixed use development.

By 2025, there will be:

- Up to 10,000 new high quality homes
- Over 5,000 new jobs created or accessed with 1million sq ft of employment and commercial space added.

This Plan includes sections on:

- 1) Achievements to date
- 2) 'Tottenham's Future' engagement programme how it shaped the Strategic Regeneration Framework
- 3) The activities to be delivered for each of the four priorities in the short- to medium-term
- 4) Programme funding
- 5) Programme risks
- 6) Governance
- 7) Communication, consultation and engagement
- 8) Monitoring including annual review.

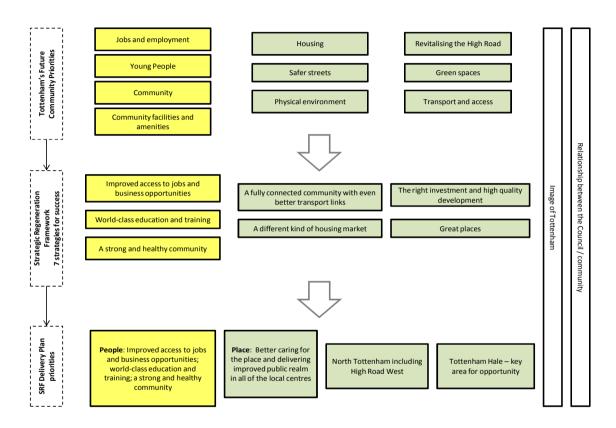

1) Achievements to date

February 2012	August 2012
£41m funding and investment approved for the regeneration of Tottenham (Council/GLA)	A Plan for Tottenham published
Tottenham Hotspur FC £430m stadium development given planning approval	Work starts to rebuild Carpetright building
HRH Prince of Wales and HRH Duchess of Cornwall visit Tottenham High Road	Adams & Sutherland appointed to design Growth on the High Road schemes
March 2012	Summer events held, part of programme for Tottenham 2012 & the Cultural Olympiad
Council/Homes for Haringey begin engaging with Love Lane estate residents about their	'Cruyff Court' multi use games area opened in Ferry Lane
priorities for improvement	September 2012
Launch of '12 in 2012' pledges for Tottenham	Construction works begin on Phase 1 of Tottenham Hotspur FC development
April 2012	Project Tottenham community film festival (part of the cultural programme)
Job Centre Plus reopened	Tottenham Medley Market takes place on Tottenham Green East
May 2012	October 2012
Carpetright planning permission approved by the Council	'Invest Haringey' event held showcasing key sites and development opportunities
Tottenham Town Centre Growth Manager appointed	Public consultation on Bruce Grove public realm projects begins
Tottenham Green Regeneration Stakeholder Group first meeting	November 2012
Arup commissioned to produce Tottenham Investment and Development Framework	Aldi reopens on the High Road
and High Road West master plan options	TfL agree to invest £20m in new 'gateway station' at Tottenham Hale
Jobs for Haringey programme launched	£34m Tottenham gyratory works start
June 2012	Public consultation on Tottenham Green regeneration designs
Seven Sisters Regeneration Project (Wards Corner site) given planning permission	December 2012
Tottenham Green stakeholder & public workshops held to inform proposals for £1.5m	Tottenham Christmas events held – a winter market, music festival and switching on
investment in the Green, facilitated by the Prince's Foundation for Building Communities	of the Christmas tree lights at Tottenham Green
Summer on the Green held as part of the London Festival of Architecture	£10k 'Town Team' funding awarded
Council and Homes for Haringey support the relaunch of the Love Lane Residents	'It took another riot' Mayor of London's Independent Panel on Tottenham report
Association	published
July 2012	January 2013
639b opened as community enterprise space by GLA	Tottenham High Street Charter launched
First Bruce Grove Regeneration Stakeholder Group meeting – informing proposals for	Planning permission approved for 285 new homes for Lawrence Road
£850k of public realm and market improvements	

February 2013	October 2013
£50m investment in new primary school and 222 homes given planning permission at	Agreement signed with John McAslan + Partners to transform an empty Tottenham
Brook House	shop into a design hub offering work placements and training to local people
THFC and Middlesex University announce University Technical College for north	'Tottenham's Future' consultation launched, delivered by Soundings
Tottenham	November 2013
	Sainsbury's superstore on the High Road opens; partnership between the Council,
Initial funding awarded by Heritage Lottery Fund for High Road restoration project in	Spurs, Sainsbury's and Job Centre Plus supported local residents in applying for the
north Tottenham	216 roles, the vast majority filled by Tottenham residents
March 2013	Special Cabinet meeting approves draft Strategic Regeneration Framework for
Planning Committee approval of proposal to demolish Chestnut Road building currently	consultation and a housing investment and estate renewal strategy
used by Opera House nightclub and replace with 64 apartments	December 2013
April 2013	Some of Tottenham's longest-serving independent businesses presented with plaques
Consultation begins on the High Road West masterplan options	to honour their contribution to the high street

4) Programme funding

The Delivery Plan contains a combination of items that vary from existing / ongoing projects to areas where more detail is required in order to put a cost to the project. Where a cost is attributable the programme shows required funding as follows:

<u>Description</u>	<u>Amount</u>
Funding Identified	
Base Council Revenue Budget	£1,068,419
One-Off Council Revenue Budgets	£2,369,500
Council Capital Budgets	£2,005,000
GLA Grant Funding	£3,305,000
Other External Grant Funding	£2,848,667
Funding not Identified	
Base Council Revenue Budget	£230,000

The item not funded at present relates to the re-shaping of service delivery in Northumberland Park ward project under the 'People' priority.

These costs only represent a sub-set of the wider Tottenham Programme, for example projects that are substantially complete or do not have a start date are not included in the costs above, this would include both GLA and Council-funded projects. Equally the wider revenue budget for staffing resources to manage the programme is not included.

The physical regeneration aspects of the programme tend to be more developed and in these cases the costs are clearer and funding has been identified. There are several items where the cost is not known at present and these largely relate to the 'People' aspects of the programme, for example, the best start in life project, improvement in health care infrastructure and services, and initiatives related to healthy life expectancy.

Also there are several items where funding is likely to become available at a later date, for example funding for education facilities, which is funded by a combination of Council and Education Funding Agency resources which are only known on an annual basis.

5) Programme risks

Risk description	RAG Rating	Mitigation	Lead Officers
Failure to secure sufficient investment and maximise the social and physical regeneration opportunities in Tottenham	A	 Cabinet approval of SRF Delivery Plan; regular review of Plan and progress Funding packages agreed with GLA and TfL for projects in delivery Work with stakeholders to secure further funding where required 	Director of Regeneration, Planning and Development; Tottenham Programme Director
Failure to secure local community/stakeholder buy in to SRF Delivery Plan programme	A	 Commitment to continue to work with the community and partners to shape projects Establish community governance structure Northumberland Park ward project will be shaped by residents 	Director of Regeneration, Planning and Development; Tottenham Programme Director
Delay to projects led/delivered by external partners	R	Regular meetings to track progress and review at Delivery Board and Joint Strategic Forum	Director of Regeneration, Planning and Development; Tottenham Programme Director
As the SRF Delivery Plan will cover a twenty year programme, risk that Council and stakeholder focus on Tottenham will not be sustained	А	 The Strategic Regeneration Framework and work by the Council and partners to date recognises the scale of the challenge in Tottenham, and sets out the commitment to deliver the seven strategies for success An annual Tottenham/SRF conference will monitor progress, celebrate success, and re-focus efforts The Delivery Plan will be reviewed in three and five years (2017 and 2019) 	Director of Regeneration, Planning and Development; Tottenham Programme Director
Risk that the Council does not deliver enabling works/ services (including business as usual) successfully to contribute to improving the image of Tottenham (e.g. public realm) and secure inward investment	А	 Delivery Board and Council Programme Board (internal, across all services) to review and track progress regularly, and resolve any issues arising Proactively respond to feedback received from residents and stakeholders Ongoing work to promote Tottenham 	Director of Regeneration, Planning and Development; Tottenham Programme Director
Risk that there is insufficient funds/resources to deliver the extensive range of candidate projects hence preventing	A	 This SRF Delivery Plan sets out the four priorities (and projects within each) where funding and resources will be directed in the short to medium term The annual Tottenham/SRF conference will monitor progress and re-focus efforts, and the Delivery Plan (and projects) will be reviewed in three and five 	Director of Regeneration, Planning and Development; Tottenham Programme Director

priorities of the programme to be	years which will allow for a review of project success to date and areas of	
achieved	new focus	

6) Governance

- Existing Groups to be retained: Joint Strategic Forum (Council and GLA, member and officer); Tottenham Programme Delivery Board (public sector); Landowners and Major Business Group expanded to include Chamber of Commerce and traders representatives
- Proposal to establish an internal Council Programme Board to include Legal, Procurement, Finance, Planning, Environmental Services and Community Safety, Housing, Corporate Property and Major Projects, Public Health, Schools and Learning, Communications
- Community governance: This key element is subject to ongoing community consultation and will be brought back to Cabinet for consideration in autumn 2014

7) Communication, consultation and engagement

It is a Council priority to ensure ongoing communication, consultation and engagement with the local community as the Delivery Plan priority projects are progressed. This will be supported by a dedicated Regeneration Communications Manager.

- The key consultations around substantial change will focus on High Road West and Northumberland Park.
- There is a recognised requirement to map stakeholders across Tottenham, and ensure closer collaboration and joined-up communication with partners
 delivering significant change in the area. This will be led by the dedicated Regeneration Communications Manager.
- There will be an annual Tottenham conference to monitor delivery of the plan and discuss major thematic issues.
- 'Tottenham News': The community-focused, monthly newsletter distributed to all residents was relaunched in June 2014 with a new identity. An audit of the distribution will be undertaken by September 2014, and the distribution channels and outlets where it is available expanded.
- The Council website Tottenham pages (<u>www.haringey.gov.uk/tottenham</u>) will be regularly updated including 'projects underway' and clear signposting of how to get involved. A Tottenham Regeneration micro site will be developed to become a focal point for all regeneration activities.
- Physical display and notice boards will be located in prominent public locations to provide information on the programme and projects, and how to get involved.
- Tours of the regeneration sites will be made available to provide insight into what's happening in the area, and four talks held per year. The talks will be short breakfast or evening events to highlight particular projects or priorities.

8) Monitoring including annual review

Work has been undertaken to establish the current position of **seven key indicators** in the Tottenham regeneration area. This includes the 3, 5, 10 and 20 year milestones for achieving London top quartile performance by 2034, and what this would mean in real terms based on the latest population and data.

The selected measures below cover the key programme priorities of access to jobs and employment, educational attainment, health, and community safety, which are indicative of the impact of wider social regeneration:

- Youth employment (18-24 year olds);
- Long-term unemployed (16-64 year olds);
- Level 4+ at Key Stage 2;
- 5 A*-Cs at GCSE including English and Maths;
- Excess weight in 10-11 year olds;
- Male life expectancy; and
- Neighbourhood crime.

The objective is to achieve convergence between the Tottenham eight wards and the London top quartile, and these measures will be tracked through the 20 year programme.¹

year olds claiming lob Seekers Allowance	Job Seeker Allowance Claimants (18-24) London Boroughs Top Quartile	Baseline Year Feb-14	Value 2.7	2017	2019	2024	2034
