12 December 2025

To: All Members of the Culture, Community Safety & Environment Scrutiny
Panel

Dear Member,

Culture, Community Safety & Environment Scrutiny Panel - Tuesday, 16th
December, 2025

I attach a copy of the following reports for the above-mentioned meeting
which were not available at the time of collation of the agenda:

6.   MINUTES (PAGES 1 - 8)

       To approve the minutes of the previous meeting

       .

7.   DRAFT LIBRARY STRATEGY - 2026-2030 (PAGES 9 - 66)

Yours sincerely

Ayshe Simsek
Democratic Services and Scrutiny Manager
0208 489 2929

MINUTES OF THE CULTURE, COMMUNITY SAFETY AND ENVIRONMENT SCRUTINY PANEL HELD ON Thursday 13th November 2025, 6.30pm

IN ATTENDANCE:

Councillors Makbule Gunes (Chair), Luke Cawley-Harrison, Sue Jameson

Councillor Emily Arkell, Cabinet Member for Culture and Leisure
Councillor Seema Chandwani, Cabinet Member for Resident Services and Tackling Inequality
Councillor Ajda Ovat, Cabinet Member for Communities

ALSO IN ATTENDANCE:

Ann Cunningham, Head of Highways & Parking
Eubert Malcolm, Director of Environment
John O'Keefe, Head of Finance (Capital, Place & Economy)
Zoe Robertson, Programme Director Wellbeing & Climate
Fola Irikefe, Principal Scrutiny Officer

Attendance Online

Councillor Mark Grosskopf
Councillor Mike Hakata, Cabinet Member for Climate Action, Environment, and Transport

Jess Crowe, Corporate Director of Culture, Strategy and Communities

Apologies for Absence

Apologies were received from Councillor Liam Carroll and Barry Francis.

The minutes of the meeting on 15th of September were approved.

The Chair opened the meeting explaining that the main purpose of the meeting was to scrutinise the proposed budget and the financial strategy in respect of the remit of the Panel which included culture, community safety and environment, she invited council officers and the Cabinet members to brief the Scrutiny Panel.

The Head of Finance, Capital, Place & Economy informed the Scrutiny Panel that the Council's financial position continued to be challenging and was driven by increasing demand and the price of services with challenges around social care, temporary accommodation, inflation, housing benefit and our property estate. The Council was forecasting that an additional £30 million would be needed, mainly across social care and temporary accommodation for 2026/27. Work had been carried out over the summer period identifying new proposals to reduce costs and increase income, resulting in £7 million worth of savings that had been put forward of which £2.3 million would be subject to consultation. There were £14.9 million previously approved savings for next year so in total savings could amount to around about £22 million. In year monitoring had shown that some of the budgets were at risk but were being monitored closely. As part of the budget preparation process it had been assumed, in line with the statute, to set a balanced budget the council would need to apply to the Government for £57 million of new exceptional financial support.

It was reported that the Council was doing everything possible to reduce spending on non-statutory services through various means including controls on all spending over £1, 000, a hold on new recruitment and also controls on commissioning and contracts. There was only one round of savings for 2026/27 unlike there was last year as the objective was to focus capacity and resources on the delivery of the existing savings programme. In respect of the five-year position, demand was forecasted to continue to increase and the aim was to minimise the use of EFS so the Council would continue to lobby the Government on the current funding system not being sustainable to meet statutory requirements.

Councillor Cawley-Harrison enquired about how the EFS interest rate was tracked since it was first in use and whether the Council would get a fixed rate for the 20-year term. The Head of Finance explained that the Council were required to repay EFS over a maximum period of twenty years and for the purpose of evaluation and budget monitoring, the Council make a certain set of assumptions around interest rates. It was noted that this depended on cash flows and interest rates and it was not easy to say a set figure. In response to Councillor Cawley-Harrison seeking clarity on whether if it can be deemed a variable rate, the Head of Finance explained that the Treasury Management Strategy statement report explained the structure and so it couldn't be deemed a variable rate.

Councillor Jameson enquired if the budget has taken on the approach of the worst-case scenario when putting the projections forward. The Head of Finance explained the projections were realistic based on evidence of demand and cost pressures that the Council were aware of.

Library Staffing Budget
The Corporate Director for Culture, Strategy and Communications reported a pressure in the library staffing budget following previous achievement of the savings as the Council had reviewed its policy on weekend pay supplements for staff to be inline with other areas in the authority. Councillor Cawley-Harrison enquired if the new approach to payment of weekend work had led to pressures across the authority in other areas aside from libraries. The Corporate Director for Culture, Strategy and Communications explained that adopting the change was bringing library staff into alignment with other areas such as leisure services, the aim was to standardise the offer for staff.

The Programme Director, Wellbeing and Climate explained that they have had the same issue with some leisure staff who work weekends, and they were standardising the offer including the one for some ex-Fusion workforce onto Haringey's terms and conditions.

Capital Programme
The Chair enquired about the loan to Alexandra Palace and the implications to the Council in the event that they have problems acquiring the income to pay back. The Head of Finance explained that they were approached by Alexandra Palace for a loan of £3.5 million to renovate the Panorama Room. The Panel heard that the full terms had yet to be agreed and the business case that has been presented thus far supported the investment and the ability for the investment to generate additional revenue to pay the loan back. Following a formal proposal, this would be reviewed further.

Councillor Jameson enquired about the interest rate that will be placed on the loan to Alexandra Palace? The Head of Finance explained that historically a margin has been applied to lending to Alexandra Palace. The aim was to cover administrative and monitoring costs associated with the loan.

The Corporate Director for Culture, Strategy and Communications further added that the Panorama Room was very much in need of an upgrade and hosted a number of events. The

Chair expressed the need to ensure that the funds would be re-paid and that the business case was sound. The Chair emphasised that the Scrutiny Panel was keen to have further assurance. The Corporate Director for Culture, Strategy and Communications explained that a full business case has been developed using treasury standards and it was expected that the loan would be funded by the income that they would generate following the refurbishment. It was further emphasised that the Council own Alexandra Palace and any further shortfall on income and deficit will come back to the Council. Due diligence would be carried out on the final proposal to ensure they were able to pay back the loan.

Councillor Cawley Harrison enquired if there was any incentive for early repayments, in response the Head of Finance explained that Alexandra Palace has had existing loans with the Council and early repayment was unlikely, but the loan would have a break clause. Councillor Jameson enquired why Alexandra Palace was preferred for the elections as opposed to Tottenham Hotspur Stadium given also that Alexandra Palace was more expensive? It was explained that the space that was hired for the 2022 election at Tottenham Hotspur Stadium was not ideal, in terms of visibility during the count and the need for a clear and secure line of sight. The Chair enquired about the invest to earn figure and it was reported that it was part of a previous proposal to develop the restaurant, however, due to cash flow management challenges they were unable to progress with the proposal.

Councillor Jameson enquired how noticeable the savings would be to residents? The Chair further added that the remit of the Panel covers front facing services and how confident were Cabinet Members that the allocated budgets could meet their service objectives.
The Cabinet Member for Resident Services and Tackling Inequality explained that in an ideal world, a bigger budget would be welcome, the Cabinet Member briefed that in terms of going out to re- tender a lot of co -production with residents was carried out and almost 9,000 people participated in the consultation.

Leisure Commercialisation - Councillor Cawley-Harrison enquired whether the figures were aspirational figures or whether they were projected figures based on a clear plan of action and it was now increasing profitability. Profitability was projected for 2028/29, and Councillor Cawley-Harrison was keen to know what was happening in terms of the years prior. He enquired further about the details behind the figures presented. The Cabinet Member for Culture and Leisure explained that the budget figures were projected, and they were based on an externally validated report that the authority commissioned to identify new and different revenue streams and income streams to come into the leisure service. She explained that its presently subsidised and the investment that has gone in over the last 12 months has been about stabilising the service. The commercialisation plan over the next 12 to 18, then 24 months would look at areas to increase service users and get more people utilising the services through the gym, pool etc. There was a range of surveys carried out that have identified different needs including a lot of unmet demand with residents that have disabilities and impairments. So work was underway to implement those improvements.

In response to a question, the Programme Director Wellbeing & Climate added that the £7.5 million figure was a rounded figure, and this was because it was a projection for the future from a wide range of services and the plan was to raise income. The income, trends and seasonality were reviewed on a monthly basis, and this was the first year of trading and it would take a while before the services were financially stable in order to provide additional savings for the Council.

Councillor Cawley-Harrison enquired further about why it would take up to three years to get to the point of income generation and queried if more needs to be done in terms of this ambition. He further enquired about the business case in terms of profitability in the future.

The Cabinet Member for Culture and Leisure expressed that they have received positive feedback regarding the improvement of the services from members of the public and that the commercialisation report was important in setting out a clear plan regarding the next steps.

The Programme Director Wellbeing & Climate added that when leisure services came back in house from Fusion, it was not in a good staffing situation with a very small workforce which required investment and improvements to the buildings and the plan was to ensure the investment pays off with an increase in income generation over time. Councillor Cawley-Harrison enquired further about what stage the commercialisation plan would come into force. The Programme Director Wellbeing & Climate explained that the financial plan for the service was part of the insourcing decision, and they have monthly management actions with finance to monitor the budget. It was noted that income and growth was part of the commercialisation.

In respect of CCTV income generation, Councillor Cawley-Harrison enquired if it was a new initiative that the authority has developed. The Cabinet Member for Communities outlined that there were a few authorities such as Camden and Richmond that do this and the projections have been made against benchmarking with these authorities and as a result of the enquiries that come through. Councillor Jameson enquired further if the estimate was a realistic one and if was something that the Council could build on. The Director of Environment explained that it has been identified as a way to raise income. The Chair enquired about the target audience aside from Insurance companies and whether residents would have to pay the same rate as businesses? The Cabinet Member for Communities explained the focus was currently mainly for insurance companies and that should residents enquire as a result of possibly being the victim of a crime etc, they would not be charged.

Optimised environmental enforcement.
Councillor Cawley-Harrison enquired if the increase was based on the fact that they had previously not issued as many FPN's and now with the Kingdom contract in place, an increase was being seen in picking up of fly tipping? The Cabinet Member for Resident Services and Tackling Inequality explained to the Panel that she requested for this item to be removed as she felt targets around PCN's and FPN's were not ideal targets and she would rather see a target on reducing the cost to clear up fly tipping and the objectives around FPN's and PCN's was something she would like corrected in advance of it going to full Council. The Chair sought clarity on whether it would then be removed from the budget and Councillor Chandwani explained that it would appear as income that the Council acquires although not as a saving proposal.

In respect of Moselle Brooks the Chair enquired over why it wasn't budgeted for previously. The Cabinet Member for Resident Services and Tackling Inequality explained that £1.1 million capital investment was being sought through borrowing to repair the culvert which had collapsed as it was over 100 years old so very much overdue repairs. The Council was currently in early conversation with the Environment Agency to look at future funding, so the £1.1 million figure was an emergency amount to carry out the initial repair, and it was phase 2 that was being discussed with the Environment Agency. Councillor Cawley-Harrison enquired further if the land was under private land and together with a number of other culverts in the borough, it was part of the conversation related to exploring opportunities to offload the burden onto private investors rather than through our own capital investment programme. The Cabinet Member for Resident Services and Tackling Inequality explained that the overall figure for repair was probably more in line with a figure of £2 million but the Council are working with staff to manage the situation and address the initial structural problems to make it safe. Once the emergency had been addressed then the long-term programme would be addressed. Councillor Jameson enquired if the Council had a full map of our culverts for Haringey? **ACTION: It was agreed that the map would be sent to the Scrutiny Panel.**

Waste Management Fleet Purchases
Councillor Cawley-Harrison re-iterated that they had not received the business case requested at the budget briefing meeting. The Cabinet Member for Resident Services and Tackling Inequality explained that as part of the bidding process for the new contract, the successful party would be purchasing the fleet for the Council and had a budget envelope as part of their bidding process. The Council would be assessing contractors against who could procure the fleet cheaper amongst other requirements. The Director of Environment further added that as part of the procurement process the chosen operator would procure the fleet on the Council's behalf as they would have the expertise and will form part of the final contract awarded April 2026.

Councillor Cawley-Harrison further added that his enquiry was about the business case to purchase as opposed to the leasing arrangements. Councillor Chandwani clarified that the ask was for the business case to purchase as opposed to lease and that it should be able to be provided. The Head of Finance explained that there has been a detailed evaluation and appraisal of the various ownership options, and this was seen to be the most efficient and cost-effective option. The Head of Finance explained that he would need to check if the Scrutiny Panel were able to see the business case because of commercial confidentiality.

Councillor Cawley-Harrison re-iterated that it was very difficult to scrutinise policy decisions when Scrutiny were not privy to the information used to make the recommendations. He further added that there were always multiple factors when making such decisions which can be based on quality, costs and the best options. The Chair further asked if the Council were buying the vehicles in order to have a more cost-effective contract? Councillor Chandwani explained that the waste contract included the vehicles to be leased.

Tree Planting
The Chair acknowledged that a green environment is beneficial to everyone queried whether during this time of financial difficulty alternative means of resourcing the planting of trees could have been found. The Cabinet Member for Climate Action, Environment and Transport outlined that the authority pledged to plant 10,00 trees and was on course to achieve this having planted 6, 000 aided by the partnership programme with residents for tree planting. It was noted that the authority was the most successful borough in the UK for tree planting. Councillor Hakata stressed that tree lined streets, and high canopy cover also equated to better health and well-being outcomes for residents, so it was a saving in the long run and was quantifiable by the NHS. The Cabinet Member also emphasised that tree planting also tackled the impacts of climate change as trees mitigate against the negative effects of many environmental concerns. The Scrutiny Panel also heard that the authority had been successful in applying for external grant funding which required match funding and the focus of this tree planting will be in lower income parts of the borough for much needed canopy cover.

Councillor Cawley-Harrison expressed that the business case for the tree planting was very light and did not marry up with the figures presented in the budget papers. Councillor Hakata apologised for the lack of clarity in the way the information was presented. The Programme Director Wellbeing & Climate expressed that she would go back and ensure the figures were accurate and explained that there was money set aside for maintaining the trees. It was noted that there was then match funding for sponsored trees and it was a complicated funding model. **ACTION: officers to double check the figures detailed in the business case.**

Councillor Cawley-Harrison emphasised that figure of £50, 000 was not significant compared to the £1.1 in additional capital spend on trees, and there was a need to understand the detail of where the 1.1 million was coming from.

Cleaner Air School Zones - The Programme Director Wellbeing & Climate explained that the scheme to help with air quality around schools could not be launched because of the pressure on the capital programme and the project would come under other projects that were happening around air quality and particularly through active travel. Councillor Cawley-Harrison enquired whether there was a plan for this going forward and what were the implication on air quality plans?

The Cabinet Member for Climate Action, Environment and Transport explained that the Clean Air School zone was still being implemented under other projects, and the council had successfully bid to support a number of schools in the borough through the GLA Clean Air for Schools programme for air filtration systems.

The Chair thanked the Cabinet Members in attendance as well as offices and the Scrutiny Panel then convened to discuss recommendations/ follow up actions they would like to put forward.

FOLLOW UP/ RECOMMENDATIONS

Leisure Commercialisation
The Panel noted that the Leisure provision was brought in house last year and so the Council now had full control so there was potentially more opportunity to generate income by utilising assets and improving the Council offer to be competitive with other comparable service providers. It was noted that the Council was now in a good position to carry out an options appraisal to analyse this properly and have a fresh options appraisal.

Follow Up: The Panel asked for more details and information to be confident about the figures presented on Leisure Commercialisation and wanted to consider other options to make the commercialisation more viable. Details of social value would also be welcomed by the Panel. This would help the Panel recommend other options for increased commercialisation of the leisure services whether within the existing model or through other means.

RECOMMENDATION: The Panel also recommended that the Overview and Scrutiny Committee further consider and comment on the budget allocation for Leisure Commercialisation as further confidence was needed on these figures.

Moselle Brook
The Panel recognised that repairing the culvert was a necessity and the budget cited that the £1.1 million allocation could potentially increase following the initial repairs.

RECOMMENDATION: The Scrutiny Panel recommended that following the initial repairs, a policy paper on the condition of the culvert and a survey regarding maintenance plans going forward with set timelines should be developed which could be reviewed on a 10-year basis. The Panel recommended robust systems for monitoring the state of the culvert be put in place.

Wate Management – Fleet Purchase
The Panel wanted further details regarding the rationale behind outright purchase as opposed to leasing the fleet. The Panel had requested the business case for purchase at their planning meeting, but it was deemed commercially sensitive.

RECOMMENDATION: That the business case on fleet management is presented at Overview and Scrutiny in their January meeting to understand if purchasing as opposed to

leasing will have significant implications on the waste procurement contract. The Scrutiny Panel felt they were unable to scrutinise this decision properly without the business case.

Tree Planting
The Scrutiny Panel accepted that tree planting will go towards addressing the imbalance in terms of accessibility to green spaces in parts of the borough, nevertheless the additional £1.1 million was a supplementary figure to what had already been allocated. The figures set out needed clarity and the business case did not seem to tally with the figures.

RECOMMENDATION: The case study presented should be more robust and accurate with details of what the implication of the allocation means to the existing tree planting budget and what other options have been considered as opposed to allocating further resources.

Clean Air School Zones
RECOMMENDATION: To provide information of how the £400,00 allocated to various schemes were being delivered through other means.

Pressure in libraries staffing budget
Follow Up: The Panel queried why there were not different pay scales with weekend opening hours planned ahead? And queried were the library hours re-considered once it was realised that the weekend hours would have an impact. The Panel asked if there is potential to appoint a member of staff that will be able to generate income in the libraries?

Alexandra Palace – Panorama Room
Follow Up: What financial safety nets were being put in place for recouping the investment in the Panorama Room at Alexandra Palace should the projected commercial benefits not come to fruition? There, was a question on the level of protections in place to recover the loan?

RECOMMENDATION: That information requested in advance of Scrutiny Panel meetings should be provided and the Panel would like to recommend that business cases related to savings should also be included in budget papers being considered by Scrutiny Panels.

Report for:	**Culture, Community Safety and Environment Scrutiny Panel**
Title:	**Engagement and consultation process to develop the library strategy**
Report authorised by:	Jess Crowe – Corporate Director for Culture Strategy and Communities
Lead Officer:	Kenneth Tharp - Director of Culture and Communities
Ward(s) affected:	All
Report for Key/ Non Key Decision:	N/A

1.   Describe the issue under consideration

1.1   The presentation provided sets out the engagement and consultation process to develop the Library Strategy for 2026- 2030 and the next steps.

2.   Recommendations

2.1   That the Panel note and comment on the engagement and consultation carried out on the Library Strategy process

2.2   That the Panel consider and comment on the Vision and Priorities of the Draft Library Strategy included at slide 13 and on the Draft Library Strategy attached at Appendix 2 that went to public consultation from Sept -Nov 2025. To note an updated version of this Strategy will go forward to Cabinet in January 2026.

3.   Background information

3.1   The Library strategy is due to be considered at Cabinet in January 2026 and the Scrutiny Panel are discussing and considering the engagement and process on the strategy in line with actions agreed at the previous Overview and Scrutiny Call in meeting that considered the Cabinet report and the call in on the changes to Library opening hours on the 6th of January 2025.

3.2   They are also asked to consider and comment on the Vision and Priorities of the Draft Library Strategy included at slide 13 and on the Draft Library Strategy attached at Appendix 2 that went to public consultation from Sept -Nov 2025.

Haringey
LONDON

- Draft Library Strategy - (September to November version)

Library Strategy

All member briefing

10 December 2025

Haringey
LONDON

- Revised opening hours following staffing restructure went live in September to deliver saving - reduces our opening hours to average levels

- Comes after a decade of falling footfall: Haringey library visitor numbers have fallen from 2m+ in 2011/12 to around 840,000 in 2024/25 (but a 20,000 increase since 2023/24)

- Highest demographic in library users are children under 12, and then 12-16 year olds; smallest is over 75s and next smallest is 17-21 year olds – how can we retain young people?

- Usage is also changing: borrowing of e-books / audio books has gone up from c600 per month in April 2019 to 6,200 in March 2025. Now our third highest stock issue after Hornsey & Wood Green.

- Strategy is intended to respond to these changes and challenges and to focus on growth and sustainability into the future – the service must change to meet changing needs – do nothing is not an option.

Engagement and Consultation Overview in 2025

Following the Budget consultation 2023/24 and Operating Hours consultation in 2024 (supported by Needs Assessment data analysis and an Equality Impact Assessment), a comprehensive programme of engagement and consultation was undertaken during 2025 to inform the development of the Library Strategy.

This included in-person sessions, targeted outreach, co-design workshops, and digital engagement.

In-Person Engagement
•Engagement took place in eight libraries during May–June 2025 (Muswell Hill was closed during this period).
•Additional sessions were held in Hornsey and Coombes Croft Libraries in October 2025 to support individual library plans.
• During June-July targeted engagement took place with young people. 6 schools visited (Alexandra Park Primary, Alexandra Park Secondary Noel Park Primary, Greig City Academy, and Highgate Wood School (after school book club and a year 7 group), a Youth Panel discussion and conversations with young people using Hornsey Library study space and Wood Green library.

Engagement and Consultation Overview in 2025 (cont.)

Co-Design Process

Two workshops were held in March and April 2025 with Friends of Libraries to scope the appetite for joining a co-design steering group.

Friends of Libraries for all libraries were invited to put forward members to the co-design steering group. The opportunity to join the steering group was also promoted through in-person engagement in libraries and online. 17 people were invited to the steering group sessions including Friends of Libraries, councillors, residents and officers.

The steering group met three times between June and August 2025 to:
- Agree proposed strategy principles
- Develop survey questions for Commonplace
- Contribute to strategic priorities based on public feedback

Engagement and Consultation Overview in 2025 (cont.)

Digital Engagement
Hard copy surveys were available as print on demand in libraries. Digital Engagement was delivered via the Commonplace platform https://haringeylibraries.commonplace.is/

- Shaping the Strategy: 280 responses
- Library Visitors: 286 responses
- Non-Users: 67 responses
- Technology in Libraries: 156 responses
- Draft Library Strategy: 52 responses

Total contributions in 2025: 841 from 428 respondents (for comparison, during 2024, there were 1362 responses to the operating hours consultation).

Formal Consultation on the draft Library Strategy
•The draft Library Strategy consultation ran from 24 September to 4 November 2025, receiving 53 responses (52 online, 1 via email).

Engagement and Consultation Overview in 2025 (cont.)

Communications
The draft Library Strategy consultation was communicated to the public via:

- Haringey People Extra newsletter
- Other newsletters e.g. Homezone
- Haringey Council social media channels (X, Facebook, Instagram, LinkedIn, Nextdoor)
- Digital screens on High Streets, council offices and libraries
- Friends of Libraries communications channels

Direct emails were sent out from Commonplace as follows:

- 6052 Commonplace subscribers subscribed to all new Commonplace project notifications were emailed about the 3 surveys launched in July.
- 1065 Commonplace subscribers subscribed to updates about library project notifications were emailed about the Technology in Libraries survey launched in August
- 1405 Commonplace subscribers subscribed to updates about library project notifications were emailed about the draft Library Strategy launched in September.

Libraries enjoy strong community support

●Libraries are seen as vital for education, digital access, social connection, and community wellbeing.

●Libraries play a vital role as free warm, safe, and inclusive spaces, especially for children, older people, and those without internet access at home.

●Lack of support for self-service and volunteer delivery models

●Fear of libraries being closed or declining service

Page 17

Libraries Usage & Perceptions

- Many CYP have used libraries in the past.

- Hornsey is most used.*

- They see libraries as space for studying and revision, reading and borrowing books & using a computer.

- They had mixed associations - quiet, comfortable, colourful, big, silent, studying, working, boring.

Dream Library Features

- Comfort & Design - *cosy spaces, bean bags, hammocks, colourful relaxing zones & privacy*

- Digital - *better computers, laptops, printers, Bluetooth enable computers.*

- Resources - *more YA book genres, better organised, full series of popular books, exam section***

- Social - *music, gaming sessions, opportunities to socialise.*

Page 18

Adults

1. Libraries as Inclusive Community Hubs

2. Youth-Centric Design, Engagement and Programming

3. Flexible, Welcoming, and Accessible Spaces for All Ages

4. Diverse and Evolving Collections

5. Digital Inclusion and Innovation

6. Strategic Partnerships and Outreach

Page 19

- Financial context locally/nationally

- Implementation of new hours (September 2025)

- Slightly different tenor of engagement – a greater understanding of the council's challenges

- Use of volunteers has been proposed by some in recent engagements

- Separately, we also now have **Haringey 2035 the Borough Vision: making Haringey a place where everyone can belong and thrive**
  - Call to Action 2: thriving places
  - Call to Action 3: supporting children & young people

●Contributing to Borough Vision including through supporting greener choices e.g. recycling facilities which support greener choices (recycling textiles, batteries, etc)

●Requesting new books or books available in other libraries (Consortium)

●Fundamental offer around digital inclusion

●Pianos in every library

●New podcast/recording studio in three libraries

●Some 'out of hours' additionality eg Library Lates and cultural events

●Some use of volunteers to support activities eg story time sessions

- Wider use of volunteers to extend the offer

- Charging for some facilities eg no charge for computer use which some libraries do

- Food and drink offer

- Library of Things

Green Libraries Manifesto

Chester Storyhouse is a library, theatre, cinema and independent arts & community centre

OPEN FOR GOOD TIMES
About Storyhouse
Newcastle City Library is a six-storey building housing a 185 seat performance space, a viewing platform, public art, cafe, exhibition area

Inspirational buildings and shared spaces

●The six guiding principles of our <u>Arts and Culture Strategy</u> :

Access, Collaboration, Equity, Growth, Life-long Learning, Visibility and Representation,

have informed the six priorities of the Draft Library Strategy.

●Our Commonplace survey invited respondents to consider how these core principles should inform our Library Strategy.

●To achieve our vision for Haringey Libraries we have identified six priorities for our Draft Library Strategy, designed to meet the evolving needs of our library users

●The six priorities will guide all nine libraries

●In addition to the overarching Library Strategy, we are creating separate custom

development plans for each individual library, co-produced with each Friends Group

Page 24

Our Vision is for Haringey's libraries to be welcoming, inclusive and trusted spaces at the heart of our borough - free to access and open to all.

As vital community and cultural hubs, they will reflect the diversity of our borough and be shaped by the people who use them.

Our libraries will support reading, learning, creativity, and wellbeing – providing services, events and activities that inform, enrich, inspire and connect our communities.

Page 25

Priority 1: Upholding Equity

Our goal is to promote equity, by ensuring that all our libraries are inclusive, welcoming spaces.

Priority 2: Improving Access

Our goal is to make our libraries more accessible, by transforming our digital and IT provision and through better communication of what libraries have to offer.

Priority 3: Encouraging Collaboration

Our goal is for library staff to work in partnership with local communities, Library Friends, local businesses and library users, to design and deliver events and activities.

Priority 4: Supporting Growth

Our goal is to establish a sustainable and affordable service, that enhances library usage and increases earned income.

Priority 5: Embedding Lifelong Learning

Our goal is to promote a love of reading and learning at every stage of life. Our libraries will support this by enhancing our Early Years provision and introducing specific services for teenagers.

Priority 6: Promoting Visibility and Representation

Our goal is for our libraries to celebrate the cultural richness of Haringey and its many communities. We will achieve this by maintaining diverse and evolving library collections.

Page 26

In five years' time, our libraries will be vibrant community and cultural hotspots
Successful implementation of our Library Strategy will make a significant contribution towards achieving the vision of Haringey 2035 - to be "*a place where all our residents have the opportunity to thrive and enjoy the best possible version of their life …a place where people can put down roots and feel they really belong.*"

We want everyone in our borough to be proud of our libraries and to take full advantage of all that they have to offer.

Haringey
LONDON

By the end of 2030, we want Haringey libraries to be vibrant community and cultural hotspots:

- We are committed to being transparent about progress towards our vision and goals

- We will report annually and are developing a suite of new Key Performance Indicators to measure progress

Inclusive & welcoming spaces

LBOC legacy of cultural activities

Wider awareness and increased usage

Better digital offer & support

More partnerships & income growth

Stronger links with schools & early years

Haringey Draft Library Strategy (2026-2030)

September 2025

Haringey Draft Library Strategy (2026-2030)

Contents

Cabinet Member Foreword

Haringey is fantastic – the world in one borough. A place brimming with creativity, vibrancy, personality, radicalism, diversity and community. It is a place where we stand up for each other. A place that is proudly distinctive.

Haringey is the London Borough of Culture for 2027 and we are planning a year of culture to celebrate our 'Rebel Borough'. We have a vision to create a borough where everyone can belong and thrive. We are proud to be a welcoming borough where 180 languages are spoken and many communities call it their home.

Haringey is a special place. We have great schools, wonderful libraries, green flag parks, and thriving shopping centres and high streets. We are home to ground-breaking artists, entrepreneurs, activists, educators; and thousands of dedicated and committed key workers. One in five jobs are in the creative industries, reflecting the importance of culture to our residents and communities.

There are still significant pockets of deprivation in the borough; life expectancy and the number of years which people are expected to live in good health show significant variation between different parts of the borough. Our nine libraries are a vital part of our local ecology and play an increasingly important role as centres of learning and engagement and as vital community and cultural hubs. They bring people together across generations and enable access to online resources, providing warm and cool spaces that are free and welcoming to all.

In March 2025, BBC research identified 190 libraries across the UK that have closed their doors in the past five years, 20 of them in London alone, reflecting the enormous pressure on local authority finances. Last year Haringey had to make the difficult decision to reduce library operating hours, from some of the longest in London to around the average of other boroughs in the capital. We know this was difficult for many residents who love our libraries as much as we do. However, we have fought to keep all of our libraries open, investing over £4.9 million pounds in refurbishing and restoring them and making them accessible for everyone, so they can continue to play a role as cherished community assets. We now want to work with you to ensure they can thrive and grow into the future.

So I am delighted to launch this draft Library Strategy for consultation. I would like to express my thanks to the Friends of Reading & Education (FORE), members of individual Library Friends Groups and particularly those who have taken part in the Library Strategy Co-Design Steering Group, along with young people from participating schools and the Youth Panel, who have all contributed to shaping our draft Vision, Principles and Priorities.

Now is your chance to have your say on whether we have identified the right priorities for the library service, to tell us what might be missing and where we should focus our efforts. Like many local authorities, Haringey faces a challenging financial situation, and it is more important than ever that we focus our limited resources where they will do the most good and have the greatest impact. I look forward to hearing your views and to working with you to help our libraries thrive into the future.

Cllr Emily Arkell,

Cabinet Lead for Culture and Leisure

Executive Summary

Introduction and Context

This five-year Library Strategy, intended to run from January 2026 – December 2030, sets out a vision for the future of Haringey Libraries, as centres of learning and as vibrant community and cultural hubs. It identifies a set of priorities for the next five years, that we believe will sustain and grow our Library Service, for the benefit of all our residents.

To arrive at the proposed priorities in this Draft Library Strategy, we have listened closely to the feedback in our online and paper surveys, to feedback from multiple engagements with school groups, other community groups, library users, as well as those who do not use our libraries, and input from Library Friends Groups, the Library Strategy Co-design Steering Group and library staff.

The feedback we received through the public consultation on library hours in 2024 and our survey on our Libraries of the Future in 2025, demonstrated that libraries, quite rightly, hold a special place in the hearts of our communities. They mean different things to different people, but above all they are free, welcoming and inclusive places of learning and engagement, that open up new worlds and new possibilities and offer a quiet sanctuary within a busy metropolis.

In a recent House of Commons debate, on the Future of Libraries (14 May 2025), Chris Kane, MP for Stirling and Strathallan, described libraries as *"the NHS for the Soul"*. He went on to say that:

"Libraries ask for very little and give us everything in return. If we value community, we must value our libraries. Let's protect them, promote them and make sure that they are there - open, welcoming and thriving for generations to come."

This is our intent – to see Haringey Libraries thrive for the benefit of all, for years to come.

Our Vision

Our Vision is for Haringey's libraries to be welcoming, inclusive, and trusted spaces at the heart of our borough - free to access and open to all.

As vital community and cultural hubs, they will reflect the diversity of our borough and be shaped by the people who use them.

Our libraries will support reading, learning, creativity, and wellbeing – providing services, events and activities that inform, enrich, inspire and connect our communities.

Our Priorities

To achieve our vision for Haringey Libraries we have identified the following priorities, designed to meet the evolving needs of our library users:

Priority 1: Upholding Equity
Our goal is to promote equity, by ensuring that all our libraries are inclusive, welcoming spaces, that everyone—regardless of background, identity, or circumstance—can access and benefit from.

Priority 2: Improving Access

Our goal is to make our libraries more accessible, by transforming our digital and IT provision, through better communication of what libraries have to offer, and by supporting people who face barriers to getting online.

Priority 3: Encouraging Collaboration

Our goal is for library staff to work in partnership with local communities, Library Friends, local businesses and library users, to design and deliver events and activities. By working together, we can improve our library service and increase public engagement.

Priority 4: Supporting Growth

Our goal is to establish a sustainable and affordable service, that enhances library usage and increases earned income. Our libraries will fuel personal, social, and economic growth, through initiatives that support well-being, life chances, skills development and pathways into work.

Priority 5: **Embedding Lifelong learning**

Our goal is to promote a love of reading and learning at every stage of life. Our libraries will support this by enhancing our Early Years provision, introducing specific services for teenagers, and encouraging learning and engagement for children and adults, through a wide range of resources, activities, and partnerships.

Priority 6: Promoting Visibility and Representation

Our goal is for our libraries to celebrate the cultural richness of Haringey and its many diaspora communities. We will achieve this by maintaining diverse and evolving library collections and building on our programme of events and activities that reflect the voices and experiences of the people who make up our borough.

Bespoke Development Plans for all 9 libraries

These priorities will guide all our libraries. In addition, we are creating separate custom development plans for each individual library.

These plans will be jointly led by the Library Service, in partnership with local Library Friends Groups. Together, they will identify specific priorities for each library that align with the main strategy, whilst also recognising the unique character, location, opportunities, and needs of the community that use it.

These individual library development plans are envisaged as "living documents" that continue to evolve over time. They will be jointly owned by each library and its users, and once developed, will exist alongside the main Library Service Strategy.

What we want our libraries to look like in 5 years' time

In five years' time, our libraries will be vibrant community and cultural hotspots:

- Our libraries will be widely recognised as inclusive, friendly and welcoming spaces, that meet the needs and aspirations of our communities

- More residents will have greater awareness of the full range of services and benefits that libraries offer.

- Our libraries will be established as vibrant cultural anchors and community hubs that foster creativity, participation, and a greater sense of connection and belonging – a lasting legacy of London Borough of Culture 2027.

- Digital exclusion will affect significantly fewer of our residents, while a stronger digital infrastructure will deliver a much-improved service for our library users.

- Through stronger collaboration between the library service and its users, library usage will have increased, and the experience of library users will be enriched, with more community-driven events and initiatives.

- Our library service will be robust and sustainable, with a stronger set of external stakeholders and commercial partners, that help our libraries remain fit for the future, and better able to support well-being, life chances, skills development, and pathways into work.

- Through establishing a multi-disciplinary and multi-service approach, our libraries will be an exemplar of the notion of life-long learning, with reading at the heart of the journey from the very first years of a child's life, through to adulthood and into older age.

- Our libraries will truly reflect the rich cultural diversity of our borough, as welcoming spaces where anyone can feel a sense of connection and belonging.

Successful implementation of our Library Strategy will make a significant contribution towards achieving vision of Haringey 2035 - to be *a place where all our residents have the opportunity to thrive and enjoy the best possible version of their life* ...*a place where people can put down roots and feel they really belong."*

We want everyone in our borough to be proud of our libraries and to take full advantage of all that they have to offer.

For further detail relating to how the strategy will achieve this, please read the full draft strategy document that follows.

Strategic Context

Our Statutory Duty

Under the Public Libraries and Museums Act 1964, local authorities in England have a statutory duty to provide a "comprehensive and efficient library service" for all who live, work, or study in the area. This includes:

- Lending books and other printed material free of charge.
- Encouraging both adults and children to make full use of the service.
- Ensuring accessibility and equity of provision across the borough.

Public libraries play a key role in delivering local government services and objectives. The national guidance allows local authorities to tailor the library service to suit what their community needs. It is the responsibility of each local authority to determine how to deliver public library services in the context of local need. The Department for Culture, Media and Sport (DCMS) oversee this to ensure adequate provision.

The supporting national polices are linked below:

- An independent review of English public libraries
- Libraries as a statutory service
- Annual Libraries Report 2023–2024
- Future of public libraries - House of Commons Library

Core Offer

A library service's Core Offer refers to the essential services and resources it consistently provides to the public
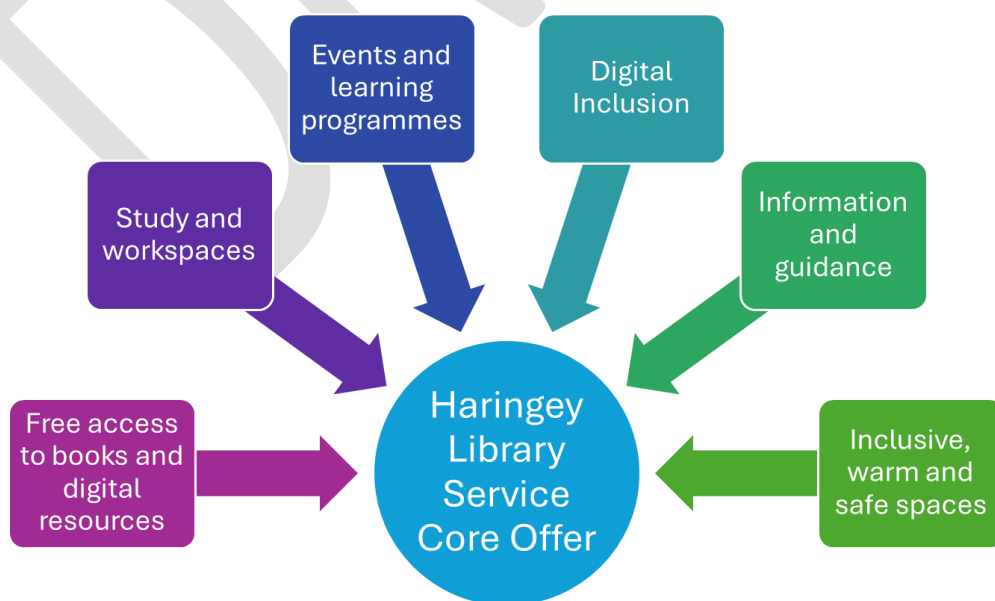

Methodology: Strategy Development

To ensure the strategy reflects the needs and aspirations of all Haringey residents, whether or not they use library services, it was developed collaboratively through a range of engagement activities with local communities and library stakeholders, including:

- A co-design group made up of library stakeholders from across the borough, meeting regularly to develop the strategy.
- Library visits and drop-in sessions hosted by Haringey staff to speak with library users.
- School visits to include the voice of young people in the future of our libraries.
- Online engagement through rich surveys to help set strategy priorities.

Local Strategy

This strategy is not a standalone document; it links with Haringey's wider corporate and cultural aims outlined in:

- Haringey 2035, Our Vision.
- Corporate Delivery Plan 2024-2026
- Arts and Culture Strategy 2024-2028

This strategy is particularly informed by the guiding principles of the Arts and Culture Strategy

Access
Striving for better access, so that everyone can benefit from, enjoy and participate in arts & culture.

Collaboration
Encouraging collaboration, especially where it leads to enhanced cultural provision, better infrastructure, increased transparency, and better access to information for our creative and cultural communities.

Equity
Supporting increased equity, by valuing, respecting, celebrating, taking pride in, and learning from our rich heritage, diverse culture, and histories.

Growth
Promoting growth and autonomy for our residents and local businesses so that they can achieve their potential.

Life-Long Learning
Ensuring that our children and young people can fully participate in rich and sustained cultural learning, and benefit from the transformative power of arts & culture throughout their lives.

Visibility & Representation
All of our communities should be able to see themselves represented in Haringey's cultural and creative offer and be actively involved in decision- making.

Libraries in Haringey

Haringey has nine library centres, and a home and digital library service, and around 65,000 active registered library users (active at least once in the last three years). As well as lending books, magazines, DVDs and other materials, the Library Service hosts many different programmes and events for Haringey residents and provides a space for other services and community groups. These include sessions run by VCS organisations, as well as other council-run services, including Haringey Works and Haringey Learns. The libraries also offer free computer and internet access, and spaces for hire. Wood Green Library, Marcus Garvey Library, and Hornsey library act as central hubs, and are the most heavily used libraries with the highest footfall. Wood Green and Marcus Garvey also have an in-person customer service centre.

Haringey has recently joined the Libraries Consortium which is a group of 23 local authorities (19 in London) set up under a unified library management system, which allows for stock, transport and digital resources to be shared and jointly managed, giving users access to resources from library services across London.

Haringey's libraries stretch far beyond the traditional services of book lending and borrowing, and act as community hubs, providing unique access to information, support, warm spaces and public facilities.

Key Facts about Haringey Libraries

- Our nine libraries have over 106,000 registered library users, of which 16,000 have been active in 2024/25.

- There has been an increase in stock borrowing by 49,372 items, from 564,644 items in 2023-24, to 614,376 in 2024-25. This is also an increase by 1.85% compared to pre-pandemic levels.

- Haringey Libraries saw a remarkable rise in digital engagement during and after the pandemic. In 2024–2025, over 68,000 more digital items were borrowed compared to previous years— almost ten times the 7,511 digital loans recorded in 2019–2020. This growth demonstrates a major shift toward digital resources and remote access services.

- We were visited by 20,000 more residents in 2024-2025 compared to 2023-24, bringing in 840,000 people in total, to access our services in person. This still represents 1.2 million fewer than 2011-12, reflecting a national long-term trend of declining footfall, but is a welcome sign of recovery since the pandemic.

- Since joining The Libraries Consortium in 2022, Haringey users have access to 7 million physical titles as well as 45K digital stock titles which has ensured stock and digital resources are utilised efficiently and effectively. In 2024-2025, almost 20,000 items were successfully borrowed thorough inter-library lending.

- Haringey Libraries are established as dynamic community hubs that bring together culture, creativity, and learning for all residents. Recent initiatives include *Library Lates* in partnership with Alexandra Palace and their Young Creatives Network, offering evening events with live music and performances, curated and hosted by the young members; the launch of *Creative Studios* featuring recording and podcast facilities to support digital content creation; and the introduction of new gallery artist spaces to showcase and nurture local talent. Libraries continue to evolve as inclusive environments that combine traditional services with opportunities for creative expression and community connection.

Shaping the Strategy with Residents

Haringey's libraries and library service are deeply valued by residents, and any future strategy must be shaped by the voices of those who use them and those who currently do not. From the outset, the development of this strategy has been rooted in meaningful engagement, ensuring that the aspirations, concerns, and ideas of our communities are reflected in our vision for the future.

Our Engagement Approach

Between March and September 2025, the Council undertook a borough-wide engagement programme, designed to reach a broad and diverse cross-section of residents and shape the draft strategy. Activities included:

- Formation of a Co-design Steering Group, made up of volunteers from Friends of Libraries groups and library users, who helped shape strategy principles and engagement questions.
- Face-to-face engagement in all libraries, in a range of schools, and a dedicated Youth Panel session.
- Digital engagement via the Commonplace platform - four thematic online surveys exploring strategy priorities, library use, non-use, and future technology.
- Targeted communications to promote the surveys through council newsletters, social media, digital screens on high streets, and Friends of Libraries networks.

Each of these engagement activities have helped shape the draft strategy.

What We Heard

Resident feedback has been vital in shaping the priorities of this strategy. These key themes emerged across all engagement activities:

Access and Opening Hours

- Emphasis on the need for consistent and predictable opening hours.
- Evening and weekend access is essential for working people and families.

Inclusivity and Accessibility

- Libraries must be physically accessible, with clear signage, ramps, and accessible toilets.
- Spaces should reflect diverse communities, languages, and needs — including neurodivergent users, older adults, and non-digital users.
- Staff training to support both visible and hidden disabilities.

Community Hubs and Social Connection

- Libraries are seen as vital "third spaces" for socialising, learning, and reducing isolation.

- Proposed activities that build social connection included: cafés, baby groups, intergenerational activities, and safe spaces for groups that need them.
- Opportunities for volunteering and community-led programming were welcomed.

Library Environment and Facilities

- Importance of comfortable, welcoming, and contemporary environments.
- Requests for better seating, quiet zones, sensory areas, and child-friendly spaces.
- Clean, warm, and well-maintained spaces.
- Flexibility of space to facilitate different needs e.g. quiet spaces for study and reading, alternative spaces for activities and social connection.

Staffing and Expertise

- Residents value friendly, knowledgeable, and visible staff.
- Staff expertise is the foundation of the service; any volunteer opportunities should be complementary, not a replacement.

Events, Activities and Learning

- Community appetite for well-publicised events: author talks, book clubs, workshops, language classes, and creative sessions.
- Libraries are seen as lifelong learning centres, especially for children, older adults, and job seekers.

Partnerships and Collaboration

- Opportunities to work with schools, local businesses, health services, and community groups.
- Suggestions for shared use of space and co-hosted events.

Promotion and Awareness

- Some residents are unaware of the full range of services libraries offer.
- Need for improved marketing, outreach, and signage — especially offline and in multiple languages.

Technology and Digital Services

- Libraries are appreciated for internet access, printing, and other digital resources.
- Suggestions included improved Wi-Fi, better public computers, and simplified printing services e.g. contactless payments.

- Some residents would appreciate inclusive digital support, including help sessions and accessibility tools.

Children, Young People and Families

- Libraries are seen as safe and enriching spaces for young people.
- Strong support for children's activities, story time, and family-friendly programming.
- Youth feedback emphasised the need for co-designed spaces, study zones, and creative tech access.

Collections and Innovation

- Desire for diverse and evolving collections, including digital formats and books for underrepresented groups, including pre-teens.
- Interest in "library of things" and sustainability-focused resources.

Draft Library Strategy: Resident Feedback

To be updated with the results of the public consultation Sep-Oct 2025

How Haringey's Arts and Culture Strategy (2024 –2028) has informed the development of this Library Strategy

Our Draft Library Strategy does not sit in isolation. The guiding principles of our Arts and Culture Strategy, listed below, have also played a key role in informing the development of our Library Strategy, its vision and its key priorities:

- Access
- Collaboration
- Equity
- Growth
- Life-Long Learning
- Visibility & Representation

Haringey's Arts and Culture Strategy was approved by Cabinet in October 2024.

Our Vision

Our Vision is for Haringey's libraries to be welcoming, inclusive, and trusted spaces at the very heart of our borough - free to access and open to all.

As vital community and cultural hubs, they will reflect the diversity of our borough and be shaped by the people who use them.

Our libraries will support reading, learning, creativity, and wellbeing – providing services, events and activities that inform, enrich, inspire and connect our communities.

Our Priorities in Detail

Priority 1: Upholding Equity

Goal

Our goal is to promote equity, by ensuring that all our libraries are inclusive, welcoming spaces, that everyone—regardless of background, identity, or circumstance—can access and benefit from.

Overview

Over the last five years, we have invested over £4.9 million in refurbishing and restoring our nine libraries, so that they can continue to play a role as cherished community assets, and as friendly, welcoming and accessible spaces for all.

Libraries are not only about books and reading. They can also act as a social place, a safe space, a warm space in winter, or a cool space in summer, a place to study, to learn, to create, to access computers, printing and free Wi-fi, or as a quiet place to sit and simply be.

We will continue to develop our libraries as vital community hubs, that serve the changing needs of our communities and help create a greater sense of connection and belonging. This will entail looking at our communities holistically, both across the borough, and within each locality, ensuring that the services we provide respond to local needs and priorities.

Our libraries will work in partnership with other council services and organisations to tackle social care challenges, promote health and wellbeing, and provide opportunities for people to access advice, support, books, and activities that improve quality of life. We want our libraries to reflect the diversity and cultural richness of our borough, and above all, to be safe places, where everyone feels included and that they belong, without fear or judgement.

We recognise the need to deliver targeted support to promote digital inclusivity, through providing access to technology and skills support for members of our community. We need to address the needs and potential barriers for different users, including those with language barriers, neurodivergent users, older adults, and non-digital users.

We will seek to use the opportunities afforded by our year as London Borough of Culture 2027, to further amplify the role of libraries as key cultural hubs, that inspire and engage.

Our libraries will continue to support the vision of Haringey 2035, *'to be a place where everyone can belong and thrive.'*

To achieve these aims we will:

- listen to our library users to shape services around their needs and aspirations.
- use data to adopt a borough-wide and local approach to reflect diverse community priorities.
- work in partnership with health, social care, and voluntary sectors to provide integrated support.
- champion inclusivity and belonging through programmed events and campaigns.
- maximise cultural opportunities to position libraries as creative and cultural hubs.
- conduct regular accessibility audits of all library buildings and services to ensure compliance with equality standards.
- deliver staff training on inclusive customer service, cultural competency, and safeguarding vulnerable users, and support for both visible and hidden disabilities.
- expand outreach programmes targeting residents in the most deprived wards, including pop-up libraries and mobile services.
- promote and enhance the Home Library Service to reach more residents with mobility, health, or caregiving barriers.
- co-design services and programmes with community representatives from protected groups to ensure relevance and inclusivity.
- monitor and report on equity-related KPIs quarterly to inform service improvements and accountability.

Outcomes

- Libraries are safe, accessible spaces for all protected groups.
- Services reflect the diversity and needs of Haringey's communities.
- Residents experience a strong sense of belonging and inclusion when using library services.
- Increased engagement from underrepresented and disadvantaged groups across the borough.
- Libraries contribute to improve health and wellbeing through targeted programmes and partnerships.
- Communities benefit from integrated services, delivered in collaboration with health, social care, and voluntary sector partners.
- Libraries act as cultural anchors, fostering creativity and participation, particularly during and post London Borough of Culture 2027.
- Digital inclusion is strengthened through access to technology and skills support.
- Libraries are recognised as trusted community hubs that reduce isolation and strengthen social connections.

Priority 2: Improving Access

Goal

Our goal is to make our libraries more accessible, by transforming our digital and IT provision, through better communication of what libraries have to offer, and by supporting people who face barriers to getting online.

Overview

Access and Equity are close cousins. By improving access, we will ensure that all the things our libraries and library service offer, reach more people, and benefit those who live, work and study in Haringey.

Good communication is essential to signalling to our residents the many positive benefits of our library service. One opportunity towards improving visibility and access, is to shape the communication of our library offer to specific target groups, for example - 'What our libraries have to offer pending mothers and fathers', or 'How libraries can support Early Years development', students studying, business development etc.

Improving physical signage, layout, and first impressions, as well as having a strong customer-facing service, supported by welcoming and committed staff, all help to make our libraries inclusive, friendly and accessible spaces.

New library opening hours will start at the end of September 2025. While a full library service can only be offered during certain hours, due to budget constraints, we're keen to support keeping libraries open for longer, by hosting events and activities with the help of Library Friends and volunteers. These ideas will be led by local Library Friends and other library users and considered individually as part of each library's Development Plan.

We live in a digital world. Expectations of digital infrastructure are ever greater. Library users expect good Wi-Fi and connectivity and up-to-date IT systems and equipment. Strengthening our digital offer can open up new vistas and new types of engagement for library users, and plans are in place to do so.

We recognise that for some users there are barriers to feeling confident in the digital realm. Some library users will need support with library cards, with online systems, with using our Haringey Library App, or with accessing online customer surveys via Commonplace. We will ensure our staff are ready to support where needed and will offer targeted programmes to promote digital literacy and support people who face barriers to getting online.

A new Community Librarian role in each library, will act as a trusted point of contact for the public, and as local connectors, who build relationships and help increase engagement.

To achieve these aims, we will:

- create a communications plan to ensure libraries make better use of our communication channels, to promote library services and events.
- strengthen digital access with reliable Wi-Fi, enhanced online services, and the Haringey Library App.

- reduce digital exclusion through skills workshops, one-to-one support, and targeted outreach.
- deploy Community Librarians as trusted local connectors to build relationships and increase engagement.
- leverage cultural opportunities such as London Borough of Culture 2027 to attract new audiences.

Outcomes

- more residents know about and use our library services.
- digital exclusion is reduced through targeted support and access.
- libraries strengthen community engagement and reduce isolation.
- residents feel a sense of belonging and connection in libraries.
- libraries reflect the diversity and needs of Haringey's communities.

Priority 3: Encouraging Collaboration

Goal

Our goal is for library staff to work in partnership with local communities, Library Friends, local businesses and library users, to design and deliver events and activities. By working together, we can improve our library service and increase public engagement.

Overview

Libraries are unique spaces that fulfil a wide range of needs for diverse communities. Nationally, public libraries have experienced a sustained decline in usage since pre-Covid levels, despite their enduring cultural and social value. This trend is reflected in Haringey, where overall visits remain below pre-pandemic figures. However, there are encouraging signs of recovery as Haringey libraries welcomed 20,000 more residents in 2024–2025 compared to the previous year, indicating a growing local re-engagement with library services.

Our belief is that collaboration between various stakeholders is fundamental to realising the fullest potential of each of our nine libraries. The Library Service is committed to working collaboratively with Friends and other community groups, local businesses and library users, to enhance and enrich the library offer and help increase engagement.

Expanding our library offer is also about empowering our communities to play an even more active and imaginative role in shaping what happens in our libraries. This could be in any number of ways, including growing the range of activities taking place, such as community events, film screenings, talks, book clubs, knowledge and skills exchange, sewing/crafting clubs and music activities.

This collaborative way of working aims to better connect libraries with our communities, increase library usage, and enrich the library service, with more community-driven events and initiatives.

To achieve these aims:

- each library will have a Community Librarian, who will be the first point of contact for collaborative engagement with library users and other stakeholders.
- Library Friends and library staff will work together to develop bespoke plans for each library that build on the uniqueness of each library, identifying new possibilities, pilot projects and proposed outcomes, that will be prioritized in a co-authored Development Plan.
- we will foster partnerships with Council services, community groups, local businesses, and organisations to co-create events and activities.
- we will expand the range of community-driven activities, such as talks, clubs, workshops, cultural events and pilot new projects and initiatives based on local interests, needs and feedback.
- we will embed the 'Encouraging Collaboration' priority across all strategic priorities, positioning libraries as key enablers and connectors for community, council, and stakeholder ambitions, in 'Improving Access, Upholding Equity, Supporting Growth, Embedding Lifelong Learning, and Promoting Visibility and Representation'.

Outcomes

- Libraries are hubs for co-delivered services and community-led initiatives.
- Each library delivers programmes and activities tailored to local needs and interests.
- Increased collaboration leads to a wider range of events, clubs, initiatives and opportunities.
- Stronger partnerships with community groups, businesses, and council services.
- Greater public engagement and higher library usage.
- New pilot projects and innovations emerge from local feedback and collaboration.
- Library users feel a greater sense of ownership and connection to their local library.
- Libraries continue to embed itself at the heart of the community, by adapting to changing needs, interests, and aspirations.
- Libraries function as dynamic enablers and connectors, driving progress across all strategic priorities by embedding collaboration at the core of the service and community role.

Priority 4: Supporting Growth

Goal

Our goal is to establish a sustainable and affordable service, that enhances library usage and increases earned income. Our libraries will fuel personal, social, and economic growth, through initiatives that support well-being, life chances, skills development and pathways into work.

Overview

Research published by the BBC in March 2025, found that '190 libraries across the UK have shut in the past five years, 20 of them in London alone', reflecting the enormous pressure on local authority finances.

In the context of ever-increasing financial pressures on local authorities, libraries will need to broaden the range and types of services provided in them and it's important to do everything we can to make sure our libraries are able to develop a strong and resilient model for the future. Part of the way forward will be in recognising the opportunity for growth, fuelled by acting upon unmet needs and yet to be realised potential.

We will continue to nurture partnerships with local businesses and cultural organisations that can help amplify and enrich our library programme and offer. We will also work closely with community organisations, Library Friends Groups and other stakeholders, to help enrich our programme of activities and events.

At the same time, we will also seek to grow our commercial income, through stronger marketing of our hireable spaces, and adopting a more entrepreneurial and outward-facing approach. A strong theme in the engagement was around provision of cafe facilities in libraries; we are about to tender for local providers to join a framework to operate cafes or food / coffee carts in council-owned locations and will seek to offer an opportunity for this in at least one of our libraries.

Given the importance of libraries in education, we will strengthen partnerships with local schools to support literacy, learning, and creativity—helping children and young people thrive in and beyond the classroom. As free and accessible spaces, libraries also offer a trusted setting for health and wellbeing initiatives, such as health clinics, which we will continue to deliver in collaboration with community partners.

In alignment with Haringey's Arts and Culture Strategy, we are keen to empower our residents to play a more active role in shaping a rich programme of events in our libraries, whilst also ensuring that the youth voice is integral to the process of decision-making and planning.

Our Libraries already play a key role to play in supporting pathways into employment, through key partnerships with organisations who deliver employment skills programmes. We will continue to support and amplify this work.

Our libraries play a vital role in supporting pathways into employment through strong partnerships with organisations delivering employment skills programmes, and we will continue to amplify this important work. In addition, a planned digital capital investment will modernise our technology and infrastructure, enabling the creation of dynamic spaces such as makerspaces and creative studios. These creative spaces will support activities such as podcasting, video production, digital design, 3D printing and music creation. Together, these enhancements will enable the delivery of digital skills programmes led by trained staff and community partners, fostering growth, enhancing the library experience, and advancing digital inclusion and economic opportunity.

We will seek to capitalise on the energy and opportunity that comes with our year as London Borough of Culture 2027, and use this to amplify the importance and presence of libraries as vibrant cultural hubs, that sit at the heart of our communities.

To achieve these aims we will:

- work with cultural, business and community partners and external stakeholders to amplify and enhance the library offer.
- grow existing partnerships with organisations to deliver employment skills programmes.
- strengthen marketing and research to increase commercial income.
- host more well-being initiatives in our libraries, such as health clinics.
- continue to offer our digital skills programme with support from external partners.
  work with key partners to support pathways into employment and enterprise.
- expand our business support offer.
- Drive innovation through digital investment and the creation of makerspaces and creative studios.

Outcomes

- Libraries contribute to economic and personal development.
- Services are financially sustainable and efficient.
- Residents gain digital and creative skills for employment and enterprise.
- Modernised spaces foster innovation and community engagement.

Priority 5: Embedding Lifelong Learning

Goal

Our goal is to promote a love of reading and learning at every stage of life, by enhancing our Early Years provision, introducing specific services for teenagers, and encouraging learning and engagement for children and adults, through a wide range of resources, activities, and partnerships.

Overview

Our libraries are there to serve our residents throughout their life, and our goal is to have an offer that underpins the principle of life-long learning. This journey begins in the earliest years.

There is no shortage of evidence to underline the importance of what happens in the first thousand days of a child's life in terms of their development. Being read to is an essential component in a child's healthy social, emotional and cognitive development, but something as seemingly simple as this does not reach every child.

A 2022 Family Survey by the Book Trust revealed that *'95% of families know it's important to read with their child but only 42% of children have a bedtime story'*[1]

The Reading Rights Interim Report from Spring 2025 states that: '*Every child should have the best start in life. Every child should have the opportunity to hear stories and experience books in their early years. As things stand, this is a privilege: a privilege shared by fewer and fewer children.*'[2]

Young children and families are already the biggest users of our libraries. Our aim is to strengthen further our Early Years offer, by seeking to adopt a multi-agency approach, across the council, that helps to ensure that early childhood reading and storytelling is part of everyday life for every family in the borough.

We will draw on examples of best practice, such as those in Birmingham, where shared reading is embedded in the multi-agency early years provision delivered through children's centres, family hubs, libraries and health visitors. Or, as in Barnsley, where health visitors plan to promote the benefits of reading to expectant parents, to help establish positive routines from before the baby's birth through the early years, through the midwifery service.

We want to strengthen our teen offer, to curate themed teen-focussed collections, and display them in ways that are more immediately accessible. To foster lifelong learning, libraries will also deepen partnerships with local schools by encouraging every primary school class to visit their local library at least once a year, with each child receiving a library membership card to encourage ongoing engagement. We will collaborate closely with school librarians to align resources and support and

[2] The Reading Rights Interim Report (March 2025) - https://files.booktrust.org.uk/docs/documents/Reading-Rights-Interim-Report-Spring-2025-low-res-b.pdf.pdf?v=1748341180

provide dedicated study spaces to foster independent learning. These service provisions will nurture a love of reading and learning from an early age, support children's educational journeys, and build lasting connections with the library.

Our Library Friends Groups are amongst our most active and engaged library users. We will continue to work closely with them and other community groups to shape a library programme that meets the needs of all our users.

To achieve these aims we will:

- Raise awareness of libraries' role in Early Years development and lifelong learning.
  - promote reading into everyday life, starting from pregnancy.
  - partner with health and Early Years services to promote shared reading.
  - expand 'Rhymetime' and 'Storytime' with sensory and multilingual elements.
  - promote books from birth packs with health services.
  - establish an Early Years & Families Advisory Forum to ensure the library offer is shaped around the developmental needs of young children and informed by family perspectives.
  - encourage every primary school class to visit the library annually, with each child receiving a library membership card.
  - inspire a love of reading and learning from an early age.
- Create a relevant, engaging library experience for teens.
  - curate themed collections that reflect the specific interests of teen library users, e.g. identity, wellbeing, careers, Manga.
  - establish a Teen Advisory Forum to co-design and shape the teenage offer, ensuring it reflects young people's interest, needs, and lived experiences.
- Launch a campaign across the borough and other council services.
  - run outreach events and pop-up libraries.
  - co-create programmes with key stakeholders and services such as schools, nurseries, Library Friends and local community groups.
- Support lifelong learning for adults.
  - promote libraries as a hub for adult learning, skills development, and personal growth.
  - maintain curated collections and resources supporting adult literacy, digital skills, ESOL, and career development.
  - maintain workshops, reading groups, and digital support sessions tailored to adult learners.
  - partner with local colleges, adult education providers, and employment services to expand opportunities.
  - encourage volunteering and peer-led learning to build confidence and community connections.
- Recognise and value community contributions through annual events and ongoing collaboration.

Outcomes

- Libraries support educational attainment and personal development.

- We will have established a strong Early Years offer that supports child development and parental bonding.
- Reaching families who may not otherwise access books or stories.
- Strengthened community ownership of library services.
- Adults are empowered to pursue lifelong learning, improve skills, and enhance employability.
- Residents benefit from inclusive programmes that foster confidence, digital literacy, and social connection at every stage of life.
- Children and young people are inspired to read and learn, with increased school engagement, access to study spaces, and a more accessible teen offer.

Priority 6: Promoting Visibility and Representation

Goal

Our goal is for our libraries to celebrate the cultural richness of Haringey and its many communities. We will achieve this by maintaining diverse and evolving library collections and building on our programme of events and activities that reflect the voices and experiences of the people who make up our borough.

Overview

'Haringey is the world in one borough. A place of creativity, personality, radicalism, diversity and community.'
The Haringey Deal

Haringey is a borough rich with cultural diversity and contrasts, where over 180 different languages are spoken, within large diasporic communities. It is important that all our communities can see themselves represented in Haringey's cultural and creative offer and be actively involved in decision-making. This helps to create a sense of belonging.

Our Library collections need to remain up-to-date and relevant. Similarly, the events and activities we promote in our libraries also need to reflect the diversity of the residents in our borough. One of the ways we can achieve this is by working more closely with our library users, Friends Groups and other interested stakeholders to better understand the needs and opportunities, and diversify our offer accordingly.

With the impetus of a new Library Strategy and with our London Borough of Culture 2027 year on the horizon, we will seek to amplify community engagement. We are committed to the ethos of the Haringey Deal, and recognise that '*Haringey's people are a huge asset, with knowledge, expertise and passion.*' We will seek to harness that energy in the way that we develop our library offer.

In parallel to this Library Strategy, Library Friends and users will work in partnership with the Library Service to develop bespoke Development Plans for each individual library. This is an opportunity for our residents to play an active role in shaping the future of our libraries and arrive at a set of shared priorities and actions for their local library.

Across the council, the youth voice is taking an increasingly active role in decision-making and advocacy. Elections for Haringey's Youth Council are taking place in autumn 2025. We will engage youth cohorts in our ongoing planning and decision-making processes, so that they are represented and have a clear stake in the future of our libraries.

To achieve these aims we will:

- regularly update and diversify collections to reflect the cultures, languages, and identities of Haringey's communities.

- co-design events and activities with Library Friends, user groups, the local community, and key stakeholders to ensure programming is relevant and inclusive.
- develop bespoke Development Plans for each library in partnership with Library Friends and local users, reflecting local priorities and community voices.
- regularly engage youth and underrepresented groups to actively shape library service provision through dedicated advisory forums, ensuring their perspectives directly inform planning and provision.
- celebrate cultural heritage and community stories through exhibitions, author talks, and creative workshops that showcase local voices.
- promote multilingual resources and events in the main languages spoken locally, reflecting the borough's diversity.
- amplify community engagement through borough-wide campaigns and partnerships, especially in the lead-up to London Borough of Culture 2027.
- recognise and value community contributions through annual events and ongoing collaboration.

Outcomes

Short Term
- Collections and events better reflect local cultures, languages, and identities.
- Community voices, including youth and underrepresented groups, start shaping library programming through targeted forums and co-design.
- Increased participation and engagement from a broader cross-section of the community.
- Each library operates with a bespoke Development Plan aligned with local priorities and community input.
- More library users are encouraged to become active in their Library Friends Group.

Medium Term
- Local heritage and stories are more visible through exhibitions and creative events.
- Multilingual resources and inclusive events improve accessibility and engagement for all residents.
- Community partnerships and campaigns drive higher attendance and awareness.
- Libraries become recognised spaces for celebrating diversity and fostering social cohesion.

Long Term
- Libraries continue to be recognised as central, inclusive spaces for cultural expression and community connection across the borough.
- Sustained community ownership and ongoing collaboration ensure services evolve with local needs.
- Haringey's diversity is fully represented and valued in all aspects of library provision, including in the active memberships of Friends Groups.

- Libraries contribute to a stronger sense of belonging, pride, and shared identity across the borough.

Monitoring and Evaluation

Progress against these priorities will be monitored through a newly established annual Libraries Performance Report. This will include performance dashboards, case studies, resident and partner feedback, and recommendations for continuous improvement. Actions relating to these recommendations will be embedded into individual library development plans to ensure accountability and long-term impact.

New Opportunities to be carried forward

A number of key themes and opportunities emerged during the public survey and engagement process. These currently sit outside our main priorities, but they are captured here as items that we are committed to exploring further in the conversations with individual libraries and their custom Development Plans.

Opportunity 1

A Library of Things: A Sustainable, Community-Centred Innovation

What is a Library of Things?

A Library of Things (LoT) is a community-powered initiative that allows residents to borrow useful household items—such as drills, sewing machines, carpet cleaners, and gardening tools—at low cost, rather than purchasing them outright. This model promotes affordability, sustainability, and social connection, aligning with Haringey's goals for inclusive and environmentally conscious community services.

The model has been successfully implemented in 17 London boroughs, including locations such as Crystal Palace, Dalston, and Canada Water. Councils have partnered with LoT to deliver services that are financially sustainable and socially impactful, often using local carbon offset funds or sustainability grants.

As part of our commitment to innovation and sustainability in library services, we are exploring the potential to introduce a Library of Things (LoT) model in Haringey.

Opportunity 2

Business Information Point Centre (BIPC) in partnership with the British Library

In partnership with the British Library, the Business & IP Centre (BIPC) is a national network that supports individuals to start, protect, and grow their businesses. It provides free access to expert advice, intellectual property guidance, and specialist resources. In Haringey, the BIPC will offer premium business databases, one-to-one support, and programmes such as *Kickstart Your Business*, alongside workshops and networking opportunities.

This initiative builds on the success of the Start-ups in London Libraries (SiLL) programme (2018–2021), in which Haringey participated as one of ten London boroughs. The SiLL initiative engaged diverse communities, delivered over 30 hours of free workshops and tailored support, and helped create new businesses with a strong focus on inclusion.

Haringey SiLL Highlights:

- 386 clients registered in Haringey — the highest among all participating boroughs.

- 92 aspiring entrepreneurs supported — individuals who received 12+ hours of support to become enterprise-ready.
- 69% of clients were women (target: 55%).
- 53% of clients were from BAME backgrounds (target: 35%).
- 27% of clients were self-employed, above the project average.
- Most popular sectors: Creative/Media/Publishing (19%) and Retail/Wholesale/Transport.
- High engagement: 82% feedback return rate from attendees.

There is an opportunity to embed and expand BIPC services through individual library development plans, making libraries key hubs for entrepreneurship and innovation, and to strengthen partnerships with local business networks, cultural organisations, and education providers to deliver sector-specific programmes.

Opportunity 3

London Borough of Culture 2027

Haringey is on a journey to embed culture and creativity across the council and weave it through everything we do, thereby helping to put culture and creativity right at the heart of our communities, not least, in our libraries.

Haringey's successful bid to become London Borough of Culture 2027 is a golden opportunity to showcase our existing and hidden creative talents, to build on our rich history and diverse heritage, to inspire creativity across the borough, and to deliver long-term change and development for Haringey.

We will work closely with our communities and stakeholders to deliver a vibrant year of culture that meets the needs and aspirations of our communities and enriches lives across all 21 wards of our borough. We will capitalise on the energy and opportunity that comes with our year as London Borough of Culture 2027, and use this to amplify the importance and presence of libraries as vibrant cultural hubs, that sit at the heart of our communities. Our London Borough of Culture year will run from April 2027 until March 2028, allowing us to take advantage of the spotlight that will shine on the borough as we prepare to welcome football fans from across Europe and the world as the Tottenham Hotspur Stadium serves as one of the host venues for UEFA Euro 2028 in June and July.

What we want our libraries to look like in 5 years' time

By the end of 2030, we want Haringey libraries to be vibrant community and cultural hotspots:

- Our libraries will be widely recognised as inclusive, friendly and welcoming spaces, that meet the needs and aspirations of our communities.

- More residents will have greater awareness of the full range of services and benefits that libraries offer.

- Our Libraries will be established as vibrant cultural anchors and community hubs that foster creativity, participation, and a greater sense of connection and belonging – a lasting legacy of London Borough of Culture 2027.

- Digital exclusion will affect significantly fewer of our residents, while a stronger digital infrastructure will deliver a much-improved service for our library users.

- Through stronger collaboration between the library service and its users, library usage will have increased, and the experience of library users will be enriched, with more community-driven events and initiatives.

- Our library service will be robust and sustainable, with a stronger set of external stakeholders and commercial partners, that help our libraries remain fit for the future, and better able to support well-being, life chances, skills development, and pathways into work.

- Through establishing a multi-disciplinary and multi-service approach, our libraries will be an exemplar of the notion of life-long learning, with reading at the heart of the journey from the very first years of a child's life, through to adulthood and into older age.

Our libraries will truly reflect the rich cultural diversity of our borough, as welcoming spaces where anyone can feel a sense of connection and belonging.

Successful implementation of our Library Strategy will make a significant contribution towards achieving vision of Haringey 2035 - to be *a place where all our residents have the opportunity to thrive and enjoy the best possible version of their life ...a place where people can put down roots and feel they really belong."*

We want everyone in our borough to be proud of our libraries and to take full advantage of all that they have to offer.

*****

Consultation on Haringey Draft Library Strategy (2026-2030)

Our Vision

Our Vision is for Haringey's libraries to be welcoming, inclusive, and trusted spaces at the heart of our borough - free to access and open to all. As vital community and cultural hubs, they will reflect the diversity of our borough and be shaped by the people who use them. Our libraries will support reading, learning, creativity, and wellbeing – providing services, events and activities that inform, enrich, inspire and connect our communities.

Our Priorities

To achieve our vision for Haringey Libraries we have identified the following priorities, designed to meet the evolving needs of our library users.

Priority 1: Upholding Equity

Our goal is to promote equity, by ensuring that all our libraries are inclusive, welcoming spaces, that everyone—regardless of background, identity, or circumstance—can access and benefit from.

1. To what extent do you agree with our priority to uphold equity?

Strongly Agree		Agree		Neutral		Disagree		Strongly disagree	

1.1 Do you have any comments about this priority?

Priority 2: Improving Access

Our goal is to make our libraries more accessible, by transforming our digital and IT provision, through better communication of what libraries have to offer, and by supporting people who face barriers to getting online.

2. To what extent do you agree with our priority to improve access?

Strongly Agree		Agree		Neutral		Disagree		Strongly disagree	

Haringey
LONDON

2.1 Do you have any comments about this priority?

Priority 3: Encouraging Collaboration

Our goal is for library staff to work in partnership with local communities, Library Friends, local businesses and library users, to design and deliver events and activities. By working together, we can improve our library service and increase public engagement.

3. To what extent do you agree with our priority to encourage collaboration?

Strongly Agree		Agree		Neutral		Disagree		Strongly disagree	

3.1 Do you have any comments about this priority?

Consultation on Haringey Draft Library Strategy (2026-2030)

<u>Priority 4: Supporting Growth</u>

Our goal is to establish a sustainable and affordable service, that enhances library usage and increases earned income. Our libraries will fuel personal, social, and economic growth, through initiatives that support well-being, life chances, skills development and pathways into work.

4. To what extent do you agree with our priority to support growth?

Strongly Agree		Agree		Neutral		Disagree		Strongly disagree	

4.1 Do you have any comments about this priority?

<u>Priority 5: Embedding Lifelong Learning</u>

Our goal is to promote a love of reading and learning at every stage of life. Our libraries will support this by enhancing our Early Years provision, introducing specific services for teenagers, and encouraging learning and engagement for children and adults, through a wide range of resources, activities, and partnerships.

5. To what extent do you agree with our priority to embed lifelong learning?

Strongly Agree		Agree		Neutral		Disagree		Strongly disagree	

Haringey LONDON
