

**Haringey Adults and Health Scrutiny Panel
14 November 2019**

**Update on redevelopment of St Ann's
Hospital and mental health beds**

**Andrew Wright, Director of Strategic Development
and
David Kovar, Interim Managing Director – Haringey**

Introduction

- Very pleased to be joining you today
- Will give an update on:
 - Redevelopment of St Ann's Hospital
 - Potential future capacity on the St Ann's site
 - Current demands on Trust beds and out of area placements
 - Plans to address increasing demand for access to beds

Update on redevelopment of St Ann's Hospital

- **New mental health inpatient building**
 - Construction commenced in January and is on time and budget
 - New building due to open in summer 2020 – July / August
 - Work underway with staff to prepare them for working in the new facilities
- **Phase 2**
 - Involves improvements to the rest of the site and site infrastructure
 - Will start in autumn 2020 and be completed by late 2021
 - Will ensure all Trust services vacate the land bought by the GLA ahead of residential development beginning
 - All services will continue on the site during the construction process

Inpatient environment

Potential future health campus development

Demands on beds and out of area placements

- BEH-MHT, like most other MHTs in London and nationally, faces increasing demands for admission to beds
- National NHS Policy in *NHS Long Term Plan* commitments increased investment in Crisis Teams and Community Mental Health Teams
- This is important and welcome, but pressures on beds are real and immediate
- Trust is creating 10 additional beds at Edgware Hospital from December
- These will replace 5 beds currently being used in East London, plus create 5 additional beds

Demands on beds and out of area placements

- Trust is clear that we need another mental health ward (c. 18 beds) within our area, to meet increasing demand
- This conclusion is supported by a recent study looking at demand and capacity, which concludes BEH-MHT does have a need for additional mental health beds
- Trust is working with partners across North Central London to seek to address this as quickly as possible, but is a need for capital investment

Out of area placements

- Trust current acute adult bed provision:
 - Barnet – 41
 - Enfield – 51
 - Haringey – 50
 - Recovery House beds (one per borough) – 30
 - Male psychiatric intensive care beds (whole Trust) – 14
- Currently an average of c. 20 patients who cannot be admitted to a local bed each day across the Trust – out of area placements
- Numbers vary from day to day and no clear cause of peaks and troughs in demand (at BEH and across London)
- National target is to eliminate all out of area placements by 2021
- Trust is working hard to achieve this, through joint working with partners, but clear need for additional ward

Questions and discussion
