Overview of the NCL Community Services and Mental Health Strategic Review Presentation to Haringey Health and Wellbeing Board

May 2021

Background to the Community and Mental Health Services Strategic Reviews

- North Central London (NCL) CCG spends more than £270m/Year across a range of NHS, Local Authority and Private Providers delivering a wide range of community Services that supports our 1.7m population across the 5 Boroughs (Barnet, Enfield, Camden, Haringey and Islington). The CCG spends a further £325m on mental health services for this population.
- Before the formation of the NCL CCG services were commissioned by each of the 5 legacy CCGs in isolation leading to variation in service delivery models and services provided. This range of services has led to variations in outcomes, inequalities in access to provision. It has also created opportunities to identify improvements.
- For community services an initial review was undertaken in 2020 and identified differing service specifications, differing thresholds for treatment, differences in reporting and not unsurprisingly differing outcomes for the population we serve.
- Local Delivery of the LTP and mental health Investment standard etc. has already started to deliver improvements in mental health. These now need to be sustainably and consistently implemented and able to cope with the rising demand for care and treatment post Covid.
- With the formation of the NCL CCG and as we move toward an Integrated Care System (ICS) along with the development of Borough Based Integrated Care Partnerships (ICPs) we are in a position to address both the issues highlighted in the initial review as well as accelerate the development of neighbourhood/PCN local Care services in line with the Long Term Plan.
- This work will also enable us to create sustainable community and mental health services that improve outcomes, addresses health inequalities and inequities and also drives better value from our current spend.

Scope of the Community and Mental Health Services Strategic Review

The scope of the Community and Mental Health Strategic Review is summarised below:

In Scope	Out of Scope
<p>All NHS funded Community Services (meaning Adult and Children and Young People services delivered outside of a hospital setting and not part of an Acute Spell) delivered by both NHS Community and Acute Providers. All NHS funded mental health services (including Perinatal, Children and Young People, Adults and Older Adults and People with a Learning Disability).</p>	<p>Continuing Health Care</p>
<p>All NHS funded Community Services delivered by Private and other Providers (Voluntary and Charitable Sector etc). This includes Community Services delivered by Primary Care partners that are not part of a Primary Care Core Contract, Locally Commissioned Service/Directed Enhanced Service or similar arrangement.</p>	<p>Care Providers / Care Homes (except non Continuing Healthcare NHS Services delivered in a Care Setting)</p>
<p>The scope also includes services such as Discharge (Integrated Discharge Teams) etc, End of Life Care , services for people with Long Term Conditions etc where these are funded by the NHS and delivered outside an acute episode of care.</p>	<p>NHS Acute Services</p>
	<p>Primary Care contracts including core GP contracts and additional NHS service contracts</p>
	<p>Statutory Homelessness Services</p>
	<p>Local Authority Commissioned Services with the NHS (except where jointly funded)</p>
	<p>0-19 Services Delivered by Local Authorities</p>
	<p>Specialist Mental Health Services for Adults and Children/Young People</p>
	<p>Learning Disability Services (Transforming Care cohort of people)</p>

Interdependencies will need to be considered and this review is being undertaken in conjunction with a strategic review of mental health services to take into account population co-morbidities and the need for integrated services for some people.

Community and Mental Health Services Strategic Review Aim & Objectives

Aim:

Our aim is to have a consistent and equitable core offer for our population that is delivered at a neighborhood/PCN level based on identified local needs and that is fully integrated into the wider health and care system ensuring outcomes are optimised as well as ensuring our services are sustainable in line with our financial strategy and workforce plans.

Objectives:

- Provision of a core & consistent offer that is delivered locally based on identified needs and that addresses inequalities and inequities of access and health outcomes.
- Provision of community and mental health services that optimises the delivery of care across NHS Primary, Secondary, Tertiary services and the wider system with Local Authority and Voluntary & Charitable Sector (VCS) partners and services.
- Moves us closer to the national aspirations around the delivery of care Out of Hospital where clinically appropriate and ensuring it is as maximally accessible as possible.
- Improved data recording and consistent KPIs to allow us to better track performance and delivery.
- Reduction in the complexity and diversity of contracting arrangements for services across NCL.
- Ensuring we have a financially sustainable system both now and into the future based on the growing and changing needs of our population.
- Ensure we deliver on national Must Dos for community and mental health services.

Structure of the Mental Health Services Strategic Review

Data Gathering & Baselineing
1-2-1 Interviews (May)
Group Interviews (May)
Health & Care Survey (May)
User/Resident Engagement (May-September)
Activity Data (May-June)
Workforce Data (May-June)
On-Going Engagement (May-October)
Partner Meeting Attendance (May-October)

Design & Iteration
Structured questionnaires
Baselining Workshop (May)
3 x Design Workshops (June/July)
Deep Dive Workshops (June/July)
Ongoing engagement
Testing and Challenging Emerging Proposals (June-July)

Refinement
Options Appraisal (June-July)
Impact Assessment (June-July)
Financial Impact Analysis (June-July)
Initial Proposal (July)
Transition Plan Development (August-September)

Engagement with Partners, Service Users and residents and the System

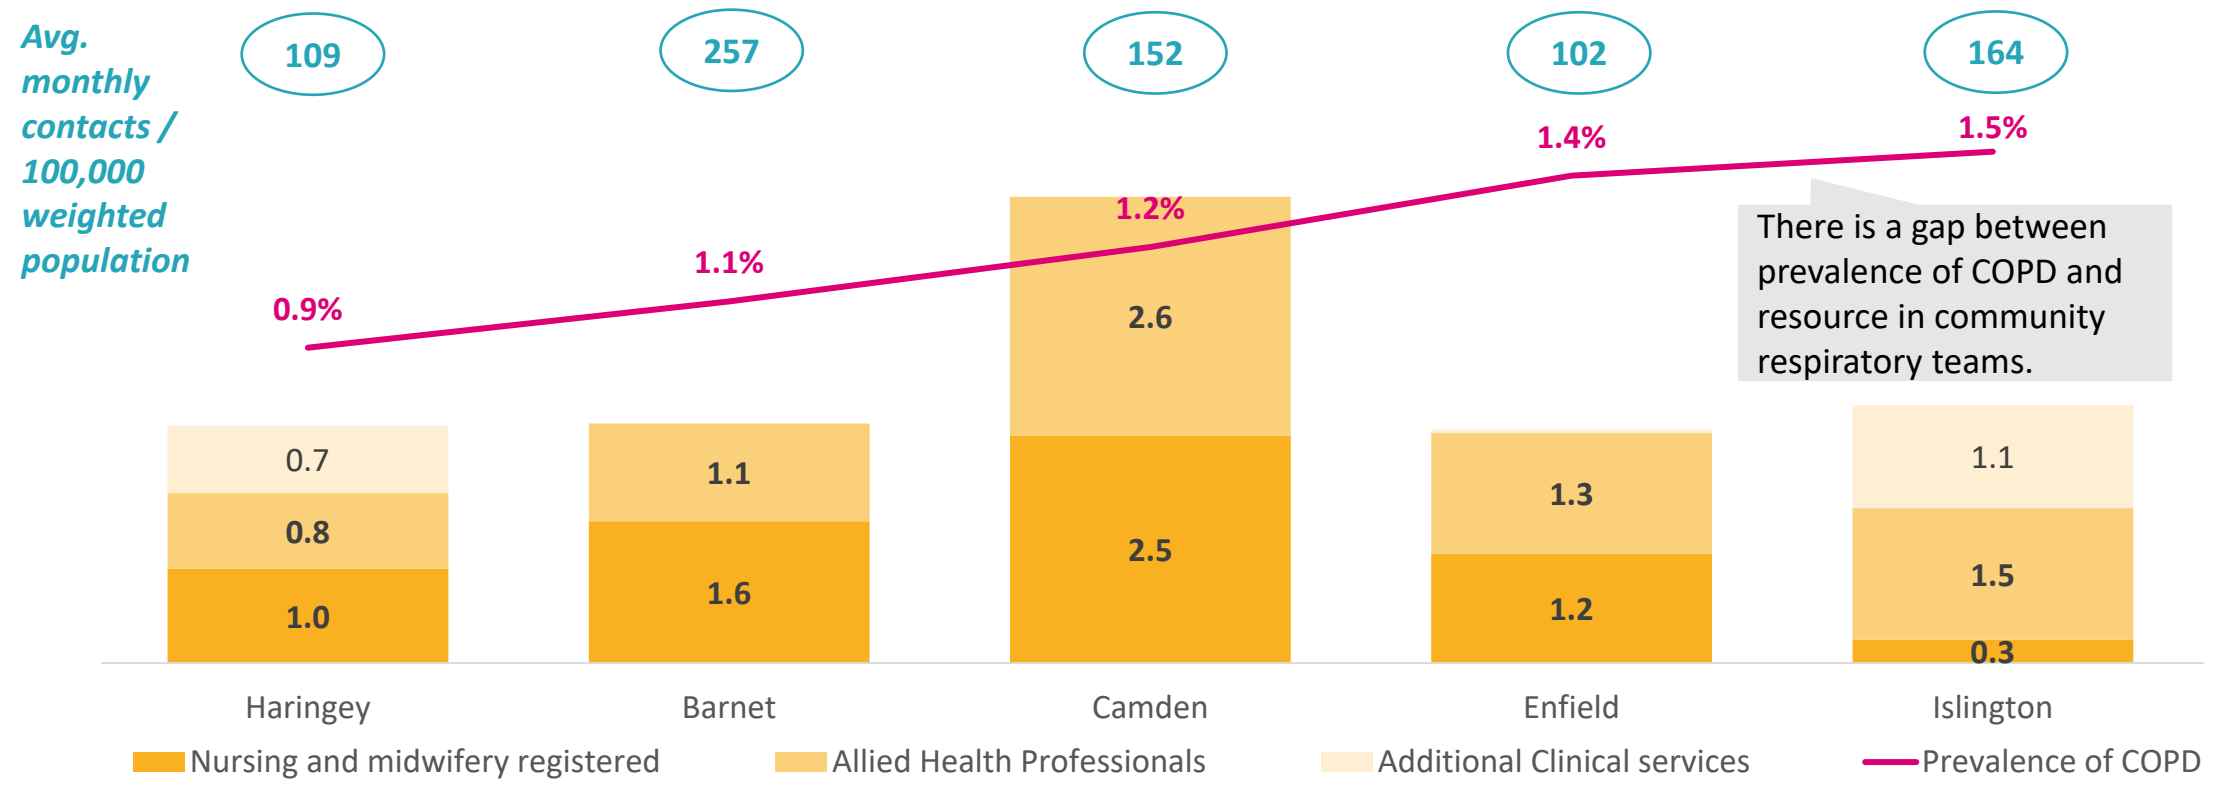

Commissioners report that patients in Enfield, Haringey and Barnet with LTCs have access to less comprehensive community health services than elsewhere

District nursing	All boroughs have district nursing provision, but there is variation in terms of scope and resource.	District nursing provision in Enfield is scaled back in comparison to other boroughs, in terms of staff numbers and skill mix.	Variation in how criteria for 'housebound' patients are implemented between boroughs.	Variation in levels of integration with GP practices, as well as variation in overnight nursing and cross-border provision.
Rapid response	The enhanced virtual ward offer in Islington and Haringey is unique in NCL. It bridges the gap between ambulatory care and rapid response.	The services operate consistently 7 days per week at least 8am-8pm, but there is variation in when last referrals are accepted ranging from last referrals received at 8pm to referrals accepted 24/7.	There is a need to ensure that pathways are consistent and enable staff to operate at the top of their license to maximise support for people at home.	
Long Term Conditions	Enfield has gaps in Long term condition teams and provision for structured education in heart failure, diabetes and respiratory.	There is a gap for community pain management services in Haringey .	There is limited structured education for patients in Enfield and Barnet . The Whittington's expert patient programme is not replicated elsewhere.	
Neuro-rehab and Stroke rehab	Pressure for neuro-rehab beds across NCL.	Neuro-Rehab Centre and St. Pancras beds now an NCL-wide offer.	Different non bedded offers. Camden, Haringey and Islington: integrated stroke and neuro community teams. Barnet: CLCH stroke services and RFH community neuro-rehab, Enfield: Community Stroke and general physio teams, some private neuro-rehab	Islington and Barnet do not have community MS nurses.
Tissue viability	There is a gap for leg ulcer care for ambulatory patients in Haringey . Additionally, tissue viability Home visits are not offered in Haringey.	The tissue viability service in Barnet is more specialist than the service in other boroughs. There is a gap for patients in Barnet who require less specialist care.	In Enfield district nurses doing more routine wound care. The specialist service is fragile. In Islington and Haringey , leg ulcer clinics are delivered by district nursing.

Resource is not aligned with need in community respiratory services

Community respiratory service budgeted FTE per 100,000 community weighted population by borough, 2019/20
 % prevalence of COPD, per GP registered population by borough, 2019/20, and average monthly contacts with community respiratory teams, per 100,000 community weighted population by borough, 2019/20

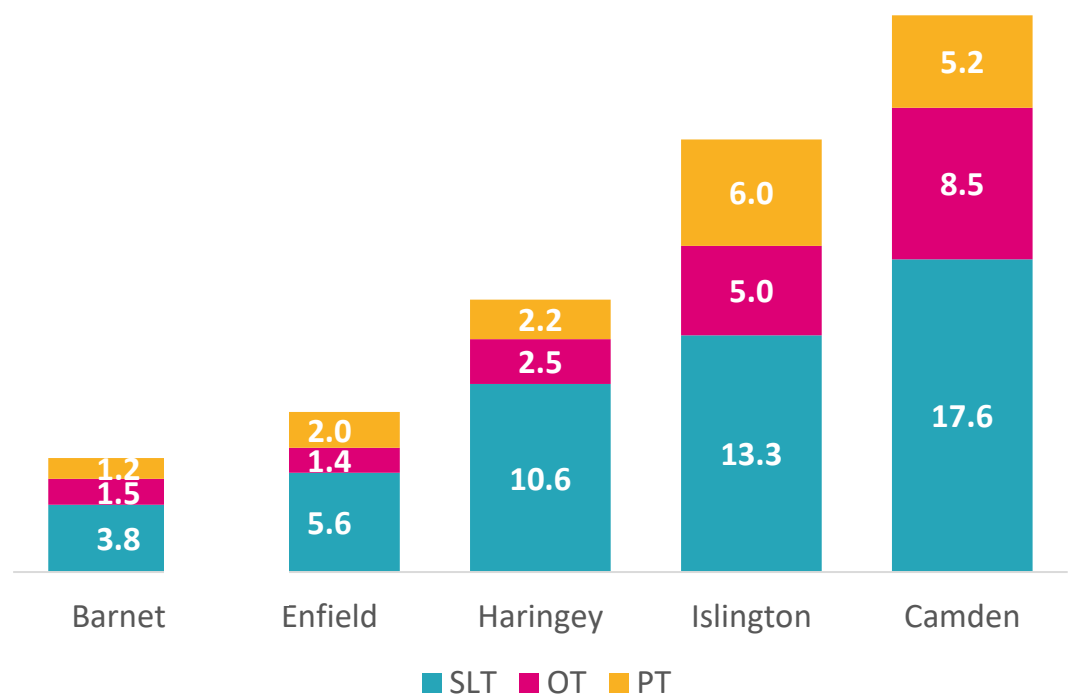

Note: Barnet (CLCH) service includes spirometry. Community spirometry provided by WH in Haringey, but not in Islington. Prevalence of COPD based on GP practice registers used as a proxy measure for demand, as there will be some patients who are not yet formally diagnosed.

There is significant variation in children’s therapy resource across NCL; Barnet has the lowest levels of resource and the longest waiting times for initial assessments

FTE for children’s therapies services, FTE per 10,000 school age pupils, 2020/21 against caseload, 2020/21

Average wait for initial assessment, weeks, as of end of March 2021

Note: detailed work is in progress by NCL CCG on the variation in service offer and provision of children’s therapies services across boroughs.

Source: NCL CCG Therapy services for CYP Current position

There is variation in resource for children’s community nursing (CCN) services; service offer and hours of operation are inconsistent, with Islington having an increased offer

Children’s Community Nursing, FTE per 10,000 population aged 0-18, 2020

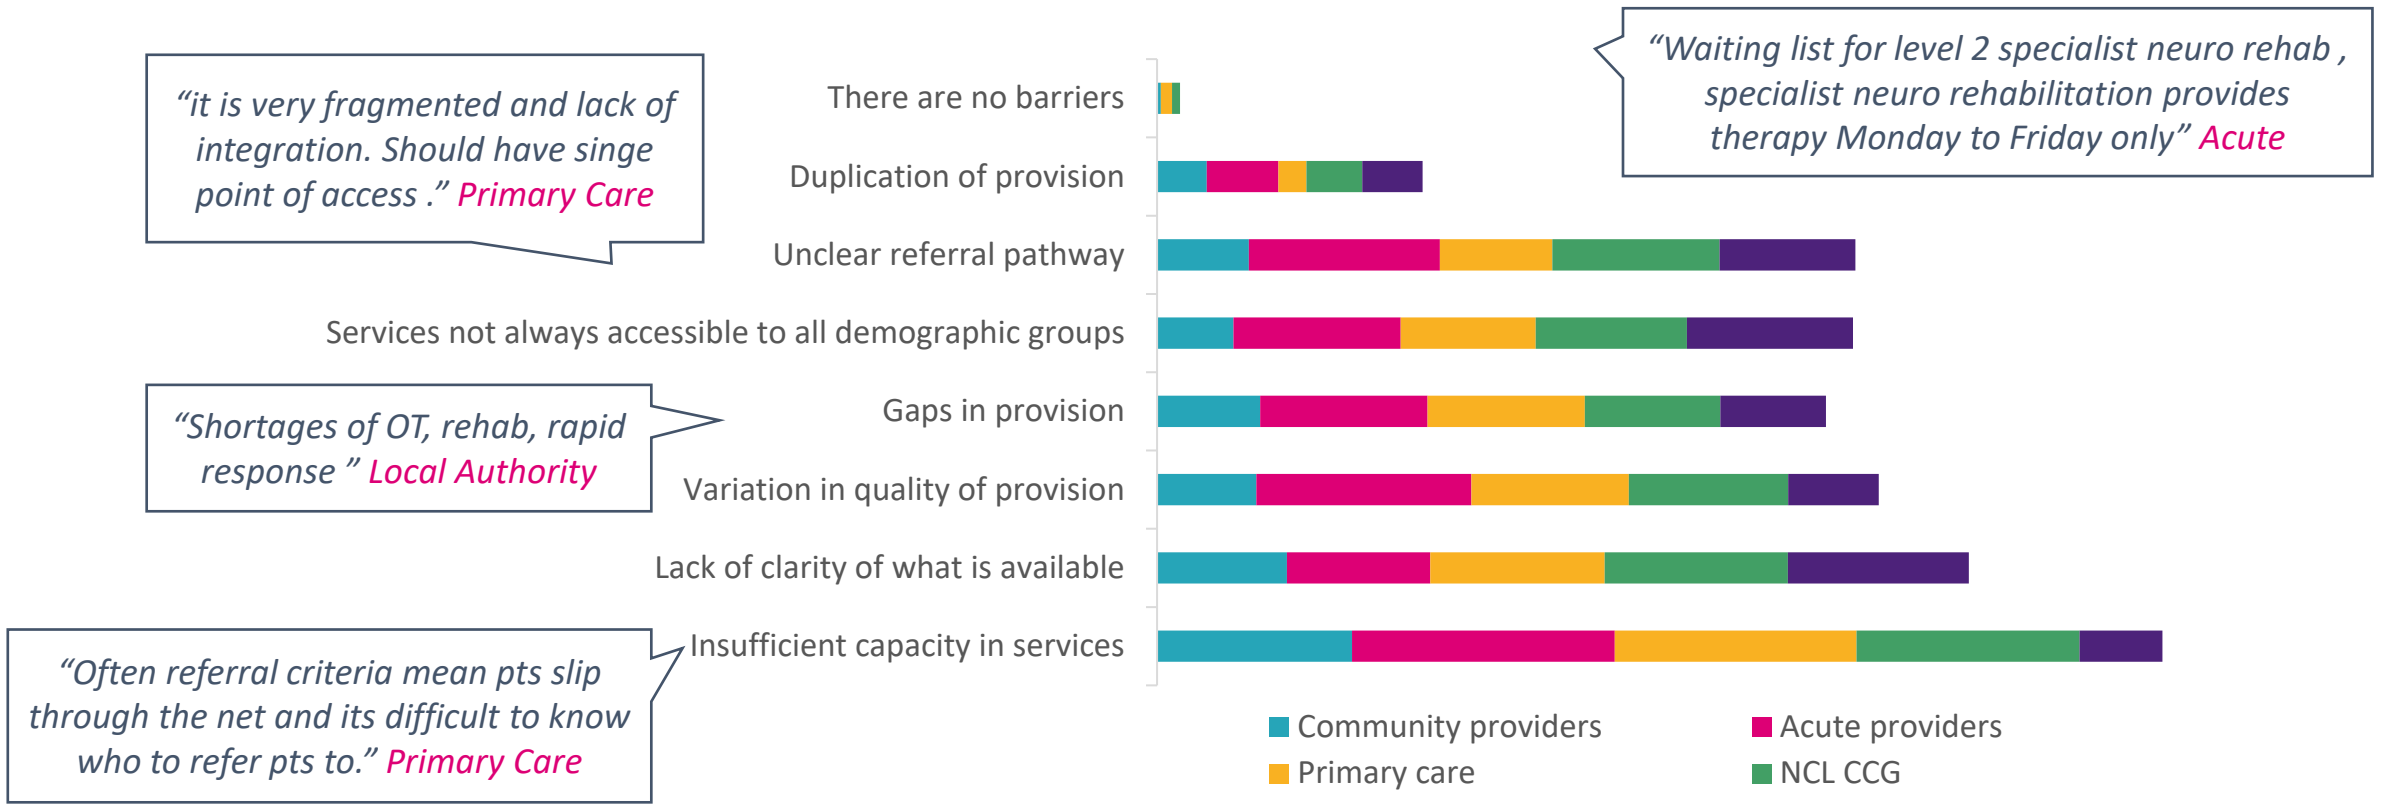

Note: detailed work is currently in progress by NCL CCG on the variation in service offer and provision of children’s community nursing services

Lack of clarity of offer, insufficient capacity and unclear referral pathways are seen as key barriers to effective community health support across NCL

Barriers preventing service users and carers from accessing and receiving effective community health care. View of answers by organisation, based on organisation respondents primarily work in. Respondents could select multiple answers

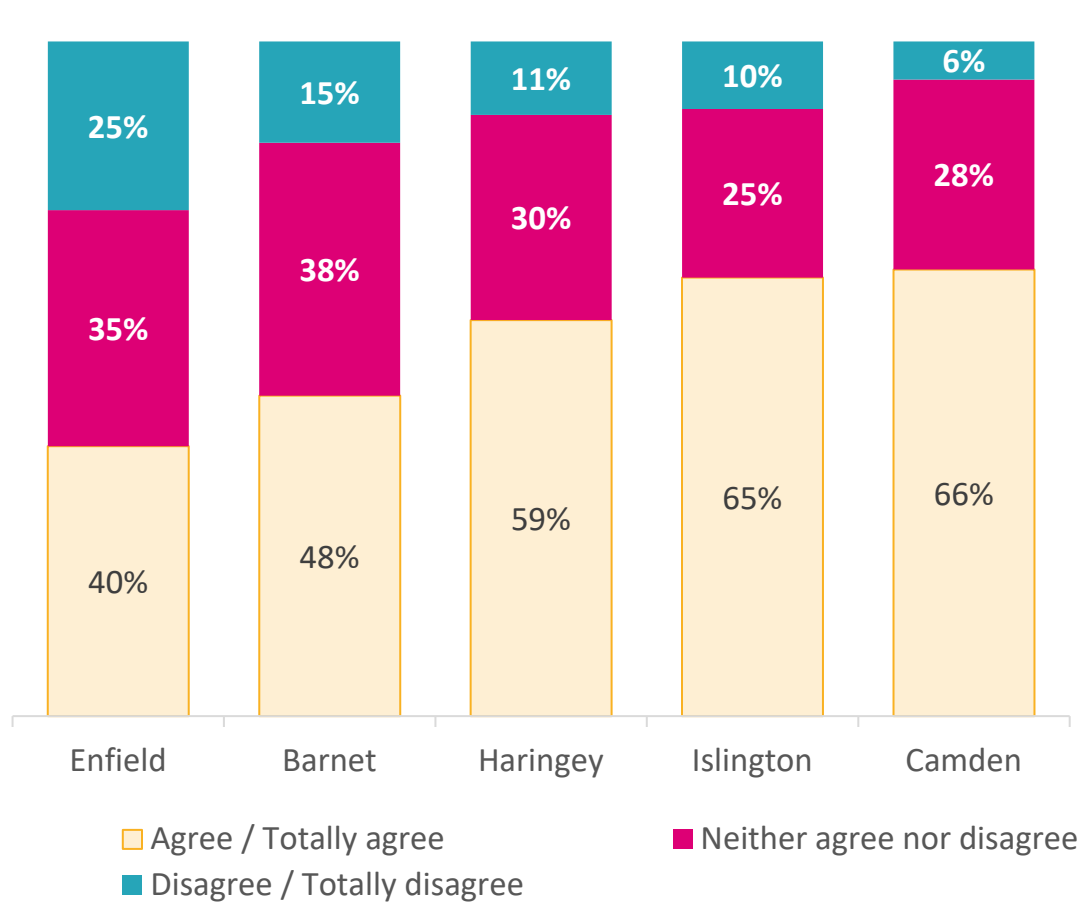

Note: Size of bar corresponds to % of respondents from borough who mentioned this barrier. Respondents were able to select multiple answers.

Source: NCL Community services review survey, 2021

In boroughs with lower levels of community spend, survey respondents felt that patients were less likely to be effectively supported with their long term conditions

Do you agree with the statement 'Community services effectively support service users with long term conditions to avoid going into an acute hospital when their health needs escalate'? View of survey answers by borough, based on geography respondents primarily work in

"There is variation between boroughs, maybe generally we are less good at upstream prevention" NCL wide

"Lack of step-down, prevention and admission avoidance." NCL wide

"Services for long term conditions are very under resourced and staffed" Enfield

"There is a deficit in specialist nurses for the area I work in to support patients at home and avoid hospital admissions." Camden
