Oscar Daliah Barrett,

After careful consideration and much thought i have decided to oppose the granting of a license to the District 22 on the grounds is that they haven't dealt with the issue of noise in the way of loud music, which i can hear clearly, as i have already made complaints several occasions about this issue, but the response from the management of the District 22 hasn't made that much difference at all, because it's not being taken seriously, as it is a concern to the residents of Coburg Road. The licensing really need to think about granting a license to the District 22, especially several complaints made against them concerning the issue of music that can be heard by me and others. Nobody from Haringey Council live in the area, because they certainly wouldn't put up with the noise coming from the District 22, so should the residents who live in the area. This application being made by the District 22 isn't the only proposal being made, as there was a planning application submitted to the Planning Department, which i also opposed as well, so both of these proposals

are interlinked in the way, should one fail, the other would be open to question, as that establishment doesn't have a good reputation in the way of Quality Management, which to say the least mediocre.

The management of District 22 haven't really got their heads around the time when everybody should be leaving, apart from the staff who work there. A winding down time should've been put in place where everybody would know that they have to leave at a certain time laid down, and it's the responsibility of the management to ensure is carried out on a daily basis, and what's happening where people are leaving at different times, and the District 22 have the gall to state's times of 1 PM and 2 PM in the early morning, well I'm against those times, as the time should be 11 PM seven days a week, as they cannot manage to people to leave the premises in an orderly way like other establishments who have good management organised and generally run their ~~establishments~~ successfully... This application will also enable the District 22 to sell Alcohol as well, and as most sensible know there will be people who will drink more than others, and nobody can be certain what the effects of alcohol will be should that license be granted by the licensing authority, but before any decision can be made of whether to grant a license or not, there

has to be conditions set out in such a way that the District 22 are left in no doubt of their responsibilities should be, as they wouldn't be in a good place as they would be in breach of their license providing of course that the Licensing Authority will give that license, because so far District 22 have been treated leniently, and that would have to change in the way of adjustments that would have to be made by the management of District 22 as theonus is on them and nobody else to carry out all relevant adjustments to the satisfaction of all concerned.

To be quite honest I'm not confident not from what I've had to endure from the District 22, but I'm not alone in this, and I'm fully aware that the decision doesn't rest with me, but the Licensing Authority who will make that decision for whatever reasons known to themselves, as I have clearly made my objections known and I certainly make no apology for that at all.

In the meantime I will patiently await the outcome of whatever decision that will be made by Licensing Authority themselves.

Yours sincerely
