SHAIKH SEIBRATZEE

FLAT 1  
John Aldis House  
Cyborg Road  
London  
N22 6TX.

Dear Dalia Barrett,

I have this earliest opportunity to express my full support of you and your department, that the Shisha area of District 22 should close at 10.30PM every night, as District 22 has been treated very well by Haringey Council by the time they were allowed to open from 0800 am to 12.30 PM closure, so they cannot say that they were treated unfairly by Haringey Council. District 22 must realise that they cannot expect anything to go their way, and that they should be grateful for what they've already got and stop whinging about a petty issue of the closure of the Shisha area at 10.30 PM, as this is something they will have to live with and move on and concentrate on what they have and to develop the business, as there will be challenges for them in the coming year ahead, these are the challenges that the management of the District 22 should focus on, instead of indulging in petty trivia. I look forward to hearing from you.

Yours sincerely  
Shaikh Seibratze.

**Subject:** Re: Objections to District 22

Dear Sirs /madam,

Please see my objections below,

this building was called the Duke of Edinburgh Pub, it has changed hands 3 times but only when they got into trouble, as this is well documented.

We do not consent to changing the times of the shisha area and drinking times, as this is where the main noise is coming from and it's been only 3 months since the last licensing review and a licence was issued against the will of the neighbours.

The main thing that we thought the Council did well was to protect the neighbours from the noise from the shisha area which closes at 10:30pm this gave consideration to the neighbours' rights to a private life. District 22 ask for an extension on their time and they got this, they also ask for an

alcohol licence, they were also given this, now less than 3 months in they are asking for the restriction on the shisha area to be lifted, we find this to be totally unreasonable as we feel the Council has been very generous towards District 22 and there are still ongoing complaints about the shisha area which cannot be ignored.

The sale of alcohol time should be kept as it gives a cooling off period and prepares the customers that the premises will be closing soon, the times, they are asking for goes right up to the wiper which means they will be leaving later and this makes no sense to be selling alcohol right up to closing time, and good establish businesses do not do this..!

The knock-on effect will be loud voices from their customers intoxicated with alcohol, car doors slamming and revving of loud engines. And we the neighbours will have to bear the Brunt of this as I've never seen any security people with high vis vests on at the weekend. Protection of residents' rights should be paramount as we felt that at least this part was acknowledged with the shisha area.

Coburg Road has a lot of elderly people living on our road, also around the corner of our road there are people with mental health conditions and young families to which the Council has a duty of care and this cannot be ignored even if this business wants to pretend that they do not exist.

We have a right to a private life and we expect these businesses to respect that and for the Council to reject this request .

This management would have known of past struggles with noise, drugs, wild parties, customers loitering, yet the first thing they did on their watch was to go for a special licence to have extra time, which disturbed us to the early hours of the morning.

District 22 are supposed to be new management but yet when they took over it felt like the same people at that time , nothing had really changed but it actually got worse, we had been disturbed by the noise from the shisha area almost every day since this management took over at that time , their customers leaving at all hours of the morning, because they were selling alcohol right up to closing time. Customers blocking our driveways, drink bottles had been left on our streets, cars with loud exhaust pipes leaving these premises at all hours of the morning waking up the households.

Part of the licence given was supposed to be that they were to have a meeting with the Council noise team in 28 days of issuing this licence and put an action plan or risk assessment of what they were going to do to restrict any noise coming from that area, to date this has not taken place to my

knowledge. But common sense would have told me that this should have been put in place before any licence was given, all parties would have had knowledge that this area cause a noise nuisance.

But of course, once a licence is issued everything else is conveniently forgotten..!! At our expense.

This management should clearly demonstrate that they can fix the noise problems in this area to industry standards and that their customers will leave on time, they have had more than enough time to sort this out but it has not been sorted out, why..?

To my knowledge the management before them, I don't think even had planning permission to do the shisha area extension , after a complaint the Council had to advise them that they had to apply, maybe someone can enlighten me in this area.

This management were given two special licences called, TEN, within days of each other, they did not finish on time and they played music over those times, which disturbed us almost every single night with Vibrations from these premises, this intern messed up are sleeping patterns and cause a lot of stress, my mother is 84 years old and her window will be facing this area, when the weather is hot the windows have to be open but when you're hearing the music noise from this building this will be Impossible.

In the last six weeks I notice that the old management are still hanging around which leads me to believe that the old management are still involved.

There has been some reduction in noise and this is something that should be standard and not to be celebrated when your business is in a residential area, we should not be disturbed by their business activities but yet this is still happening..!

The only time this building was running properly was when it was the Duke of Edinburgh Pub, it was a community pub and the management respected the Residence.

Since then, every single person that has moved into the pub has given problems, stress to the residents and does not follow the rules.

To date there have been no improvement on the shisha area..!

Please see complaints below to date that was put into the Council and reference numbers given from Haringey Council Noise team.

**Subject:** RE: Variation of Premises Licence- District 22, 83 Mayes Road, Wood Green, London N22 6UP - Objection

I object and have the following comments on this application:

1. I object to this licence extension as the original licence has only been in existence for little over 2 months and was necessarily restricted due to the substantial history of anti-social behaviour from this venue. The current period of operation covers winter months when clientele will be reduced and so the impact of larger attendances hasn't been properly considered.
2. Its troubling that the application has been made little over a month after the original licence was granted, when clearly no impact can be assessed on the local community. The impression is given that the licensee doesn't care about this and will simply submit applications at the earliest opportunity without regards to local community feelings.
3. The existing licensing conditions should continue for 12 months, from originally being granted, so that the full impact can be assessed over all times of the year, as to whether the anti-social behaviour that has blighted this area can truly be said to be a thing of the past.
4. On Page 17, "Date Created: 9th December 2023", I presume this should be 2022?

**Subject:** Re: District 22

Dear Ms Barrett,

My concerns are: that the shisha area will be an open area to some extent (due to smoking) and so the noise will carry across to residents on Coburg Road to an unacceptable degree. Regardless of music, the sound of, say, 100 customers sitting outside only 10-15 yards away from residential homes can only lead to disturbances for them. The noise department is clearly under-resourced and to prevent the inevitable future disturbances the hours for the shisha area should not be extended. There is also the matter of parking on Coburg Rd, whereby residents drive ways are taken up by District 22 customers. Extension of hours

would further exacerbate this on-going issue. It has yet to be seen if District 22 will successfully implement the noise policies they have proposed, and so I think it would be fair to see how they perform under the current license before any variations are considered.

Yours Sincerely,

Robert Bayley.
