

Appendix 2

Engagement / Consultation for Flood Water Management Investment Plan

The various flood water management schemes developed through the FWMIP will, wherever practical, be the subject of engagement and consultation or, in limited circumstances (e.g., routine maintenance), notification. The level of engagement / consultation will depend upon the size and impact of the scheme on the local community and whether statutory requirements apply. The three engagement / consultation / notification types are:

- **Notification of works** (schemes that have a minor impact on the highway network and public realm and do not require a statutory consultation to be undertaken)– residents and businesses of affected properties will be notified by letter drop where this impacts on residents. In addition, they will be notified by letter drop and any other appropriate media up to 4 weeks in advance of work commencing. In these instances, any 'co-design' component will either be limited (as it relates to straightforward maintenance or optimising the existing drainage arrangements) or related to off-highway works for which a separate co-design may be needed (e.g., with the Parks Service and any relevant Friends Group).
- **Statutory notification** e.g., traffic regulation orders - the public will be notified of the Council's intention regarding proposals through advertisements placed in the local press and on site. Residents and businesses locally affected by the proposals will also be notified by letter drop. The notification will provide details of the scheme and a commencement date for the proposed construction works. Residents, traders, and stakeholders will have the opportunity to provide views, through appropriate local engagement, on scheme proposals before it progresses to the more formal stage of statutory consultation.
- **Public consultation** – any larger schemes that impact more widely on stakeholder interests will be subject to a co-design engagement process with the locally affected properties and lead user groups (where applicable e.g., for parks). The co-design process will include input from stakeholders as to the issues, aspirations and challenges which will inform the design development followed by presentation and further stakeholder input once the designs have been developed by the Council. Meetings will include site visits, public and Microsoft Teams meetings, exhibition of proposals on the website, on local notice boards and potentially at drop-in sessions for the wider community. Once a co-designed scheme has been developed, statutory consultation can follow.
- Below sets out the proposed consultation process for each scheme.

Engagement / Consultation on Flood Water Management Investment Plan 2023/24

Scheme name / type	Consultation Type		
	Notification	Statutory Notification	Engagement / Consultation
Queen's Wood NFM Scheme	✓		
Chestnuts Park Rainscape Masterplan	✓	✓	✓
Larkspur Close (IUD) - Phase II Scheme completion	✓	✓	
Muswell Hill Flood Mitigation Scheme completion	✓	✓	(Where applicable)
Priory Park Phase 1 Flood Mitigation Scheme	✓	✓	✓
Broad Lane, Spondon Road SuDS Scheme	✓		
Gullies civils works	✓		
Borough wide Strategic SuDS Pilot Study and Schemes	✓
