

1. The development hereby authorised must be begun not later than the expiration of 3 years from the date of this permission, failing which the permission shall be of no effect.

Reason: This condition is imposed by virtue of the provisions of the Planning & Compulsory Purchase Act 2004 and to prevent the accumulation of unimplemented planning permissions.

2. The development hereby authorised shall be carried out in accordance with the following approved plans and specifications:

Drawings

01 044_A-080_REV 02, 044_A-090_REV 02, 044_A-095_REV 05 044_A-100_REV
13 044_A-101_REV 01, 044_A-102_REV 01, 044_A-103_REV 01, 044_A-110_REV
10 044_A-111_REV 07, 044_A-112_REV 08, 044_A-113_REV 07, 044_A-114_REV
01 044_A-200_REV 02, 044_A-201_REV 02, 044_A-202_REV 02, 044_A-203_REV

02 044_A-214_REV 05, 044_A-215_REV 05, 044_A-216_REV 06, 044_A-217_REV
044_A-310_REV 05, 044_A-311_REV 04, 044_A-314_REV 01

Documents:

Circular Economy Statement, Daylight and Sunlight Report, Draft Residential Travel Plan, Embodied Carbon Statement, Flood Risk Assessment Drainage Strategy, Heritage Statement, Hornsey Police Station - Fire Statement - Issue 01 Hornsey Police Station - Transport Statement , Hornsey Station planning statement v6 150622, Landscape Statement 030822-03, Statement of Community Involvement, UGF Statement, Energy and Sustainability Statement, Overheating Assessment

3. Prior to the commencement of any above ground building, detailed drawings, including sections, to a scale of 1:20 and to confirm the detailed design and materials of the:
 - a) Detailed elevational treatment;
 - b) Detailing of roof and parapet treatment;
 - c) Details of windows, which shall include a recess of at least 115mm and obscuring of the flank windows;

- d) Details of entrances, which shall include a recess of at least 115mm;
- e) Details and locations of rain water pipes;
- f) Details of key junctions including cills, jambs and heads of windows, balconies and roof parapet.
- g) Details of the communal entrance, overhangs, projections, parapets, soffits, balcony and planter edges will be required in regards to block B and details of the roof material, bin store, bike store, balcony, gutter, ridge, dormer window and balcony in regards to block C should have a scale of 1:10 or 1:5 and;
- h) **Samples** of cladding, windows, roof tiles, bricks and glazing, should also be provided.

The development shall thereafter be carried out strictly in accordance with the approved details.

Reason: To safeguard and enhance the visual amenities of the locality in compliance with Policies DM1 of the Development Management Development Plan Document 2017

- 4 Prior to first occupation of the development details of exact finishing materials to the boundary treatments and site access controls shall be submitted to the Local Planning Authority for its written approval. Once approved the details shall be provided as agreed and implemented in accordance with the approval.

Reason: In order to provide a good quality local character, to protect residential amenity, and to promote secure and accessible environments in accordance with Policy D4 of the London Plan 2021, Policies DM1, DM2 and DM3 of the Development Management Development Plan Document 2017

- 5 Prior to the first occupation of the development hereby approved full details of both hard and soft landscape works shall be submitted to and approved in writing by the Local Planning Authority, and these works shall thereafter be carried out as approved.

Details shall include information regarding, as appropriate:

- a) Proposed finished levels or contours;
 - b) Means of enclosure;
 - c) Hard surfacing materials;
 - d) Minor artefacts and structures (e.g. Furniture, play equipment, refuse or other storage units, signs, lighting etc.); and
- Soft landscape works shall be supported by:
- e) Planting plans;
 - f) Written specifications (including details of cultivation and other operations associated with plant and/or grass establishment);
 - g) Schedules of plants, noting species, plant sizes and proposed numbers/densities where appropriate; and

h) Implementation and long-term management programmes (including a five-year irrigation plan for all new trees). The soft landscaping scheme shall include detailed drawings of:

- i) Existing trees to be retained;
- j) Existing trees which will require thinning, pruning, pollarding or lopping as a result of this consent; and
- k) Any new trees and shrubs, including street trees, to be planted together with a schedule of species which shall provide 7 new trees.

The approved scheme of planting, seeding or turfing comprised in the approved details of landscaping shall be carried out and implemented in strict accordance with the approved details in the first planting and seeding season following the occupation of the building or the completion of development (whichever is sooner). Any trees or plants, either existing or proposed, which, within a period of five years from the completion of the development die, are removed, become damaged or diseased shall be replaced in the next planting season with a similar size and species. The landscaping scheme, once implemented, is to be retained thereafter.

Reason: In order for the Local Planning Authority to assess the acceptability of any landscaping scheme, thereby ensuring a satisfactory setting for the proposed development in the interests of the visual amenity of the area consistent with Policy DM1 of the Development Management DPD 2017 and Policy SP11 of the Local Plan 2017.

- 6 Prior to first occupation of the development hereby approved details of all external lighting to building facades, street furniture, communal and public realm areas shall be submitted to and approved in writing by the Local Planning Authority, in consultation with the Met Police. The agreed lighting scheme shall be installed as approved and retained as such thereafter

Reason: To ensure the design quality of the development and also to safeguard residential amenity in accordance with Policies D4 and D11 of the London Plan 2021, Policy SP11 of Haringey's Local Plan Strategic Policies 2017 and Policy DM1 of the Development Management Development Plan Document 2017.

- 7 No development shall commence until details of all existing and proposed levels on the site in relation to the adjoining properties be submitted and approved by the Local Planning Authority. The development shall be built in accordance with the approved details.

Reason: In order to ensure that any works in conjunction with the permission hereby granted respects the height of adjacent properties through suitable levels on the site in accordance with Policy D4 of the London Plan 2021, Policy DM1 of the Development Management Development Plan Document 2017, Policy SP11 of Haringey's Local Plan Strategic Policies 2017.

- 8 Prior to the commencement of above ground works of each building or part of a building, details shall be submitted to and approved, in writing, by the Local Planning Authority to demonstrate that such building or such part of a building can achieve 'Secured by Design' Accreditation. Accreditation must be achievable according to current and relevant Secured by Design guide lines at the time of above grade works of each building or phase of said development.

The development shall only be carried out in accordance with the approved details

Reason: In the interest of creating safer, sustainable communities.

- 9 Prior to the first occupation of each building or part of a building or its use, 'Secured by Design' certification shall be obtained for such building or part of such building or its use and thereafter all features are to be retained.

Reason: In the interest of creating safer, sustainable communities.

- 10 If, during development, contamination not previously identified is found to be present at the site then no further development (unless otherwise agreed in writing with the Local Planning Authority) shall be carried out until a remediation strategy detailing how this contamination will be dealt with has been submitted to and approved in writing by the Local Planning Authority. The remediation strategy shall be implemented as approved.

Reason: To ensure that the development is not put at unacceptable risk from, or adversely affected by, unacceptable levels water pollution from previously unidentified contamination sources at the development site in line with paragraph 109 of the National Planning Policy Framework.

- 11 a. Prior to the commencement of the development, evidence of site registration at <http://nrmm.london/> to allow continuing details of Non-Road Mobile Machinery (NRMM) and plant of net power between 37kW and 560 kW to be uploaded during the demolition/construction phase of the development shall be submitted to and approved by the Local Planning Authority.
- b. Evidence that all plant and machinery to be used during the demolition and construction phases of the development shall meet Stage IIIB of EU Directive 97/68/ EC for both NOx and PM emissions shall be submitted to the Local Planning Authority.
- c. During the course of the demolitions, site preparation and construction phases, an inventory and emissions records for all Non-Road Mobile Machinery (NRMM) shall be kept on site. The inventory shall demonstrate that all NRMM is regularly serviced and detail proof of emission limits for all equipment. All documentation shall be made available for inspection by Local Authority officers at all times until the completion of the development.

Reason: To protect local air quality and comply with Policy 7.14 of the London Plan and the GLA NRMM LEZ

- 12 A. Demolition works shall not commence until a Demolition Environmental Management Plan (DEMP) has been submitted to and approved in writing by the local planning authority whilst
- B. Development shall not commence (other than demolition) until a Construction Environmental Management Plan (CEMP) has been submitted to and approved in writing by the local planning authority.

The following applies to both Parts A and B above:

- a) The DEMP/CEMP shall include a Construction Logistics Plan (CLP) and Air Quality and Dust Management Plan (AQDMP).
- b) The DEMP/CEMP shall provide details of how demolition/construction works are to be undertaken respectively and shall include:

- i. A construction method statement which identifies the stages and details how works will be undertaken;
 - ii. Details of working hours, which unless otherwise agreed with the Local Planning Authority shall be limited to 08.00 to 18.00 Monday to Friday and 08.00 to 13.00 on Saturdays;
 - iii. Details of plant and machinery to be used during demolition/construction works;
 - iv. Details of an Unexploded Ordnance Survey;
 - v. Details of the waste management strategy;
 - vi. Details of community engagement arrangements;
 - vii. Details of any acoustic hoarding;
 - viii. A temporary drainage strategy and performance specification to control surface water runoff and Pollution Prevention Plan (in accordance with Environment Agency guidance);
 - ix. Details of external lighting; and,
 - x. Details of any other standard environmental management and control measures to be implemented.
- c) The CLP will be in accordance with Transport for London's Construction Logistics Plan Guidance (July 2017) and shall provide details on:
- i. Monitoring and joint working arrangements, where appropriate;
 - ii. Site access and car parking arrangements;
 - iii. Delivery booking systems;
 - iv. Agreed routes to/from the Plot;
 - v. Timing of deliveries to and removals from the Plot (to avoid peak times, as agreed with Highways Authority, 07.00 to 9.00 and 16.00 to 18.00, where possible); and
 - vi. Travel plans for staff/personnel involved in demolition/construction works to detail the measures to encourage sustainable travel to the Plot during the demolition/construction phase; and
 - vii. Joint arrangements with neighbouring developers for staff parking, Lorry Parking and consolidation of facilities such as concrete batching.

d) The AQDMP will be in accordance with the Greater London Authority SPG Dust and Emissions Control (2014) and shall include:

- i. Mitigation measures to manage and minimise demolition/construction dust emissions during works;
- ii. Details confirming the Plot has been registered at <http://nrmm.london>;
- iii. Evidence of Non-Road Mobile Machinery (NRMM) and plant registration shall be available on site in the event of Local Authority Inspection;
- iv. An inventory of NRMM currently on site (machinery should be regularly serviced, and service logs kept on site, which includes proof of emission limits for equipment for inspection);
- v. A Dust Risk Assessment for the works; and
- vi. Lorry Parking, in joint arrangement where appropriate.

C. Additionally, the site or Contractor Company must be registered with the Considerate Constructors Scheme. Proof of registration must be sent to the Local Planning Authority prior to any works being carried out.

Reason: To safeguard residential amenity, reduce congestion and mitigate obstruction to the flow of traffic, protect air quality and the amenity of the locality.

13 Before development commences other than for investigative work:

- a. A desktop study shall be carried out which shall include the identification of previous uses, potential contaminants that might be expected, given those uses, and other relevant information.
- b. Using this information, a diagrammatical representation (Conceptual Model) for the site of all potential contaminant sources, pathways and receptors shall be produced. The desktop study and Conceptual Model shall be submitted to the Local Planning Authority. If the desktop study and Conceptual Model indicate no risk of harm, development shall not commence until approved in writing by the Local Planning Authority.
- c. If the desktop study and Conceptual Model indicate any risk of harm, a site investigation shall be designed for the site using information obtained from the desktop study and Conceptual Model. The site investigation must be comprehensive enough to enable; a risk assessment to be undertaken, refinement of the Conceptual Model, and the development of a Method Statement detailing the remediation requirements.
- d. The risk assessment and refined Conceptual Model shall be submitted, along with the site investigation report, to the Local Planning Authority which shall be submitted to, and approved in writing by, the Local Planning Authority prior to that remediation being carried out on site.

- e. Where remediation of contamination on the site is required, completion of the remediation detailed in the method statement shall be carried out and a report that provides verification that the required works have been carried out, shall be submitted to, and approved in writing by the Local Planning Authority before the development is occupied

Reason: To ensure the development can be implemented and occupied with adequate regard for environmental and public safety.

- 14 Prior to any works commencing on site, full details of the provision of long and short-stay cycle parking provision, for both residential and non-residential elements of the development, in line with the London Plan (2021), shall be submitted to and approved by the local planning authority. The cycle parking provision shall be designed and implemented in line with the London Cycle Design Standards and the dimensioned details of the cycle parking provision shall be submitted for review and thereafter all details submitted shall be implemented in full accordance with the approved details and maintained thereafter.

Reason: To promote travel by sustainable modes of transport and to comply with the London Plan (2021) standards and the London Cycle Design Standards.

- 15 Before any works on site commence, full details of the provision of secure, weatherproof mobility scooter charging and parking/storage provision, including layouts and dimensional details, for the occupiers of the accessible units within the development shall be submitted to and approved by the local planning authority and shall be implemented in full accordance with the approval and maintained thereafter.

Reason: To promote travel by sustainable modes of transport and to comply with the London Plan (2021) standards and the London Cycle Design Standards.

- 16 Before any works on site commence, full details of a Delivery and Servicing Plan (DSP) which shall include a waste management plan that details how refuse is to be collected from the site shall be submitted to and approved by the local planning authority and shall be implemented fully in accordance with the approval and maintained thereafter.

Reason: To ensure that the development does not prejudice the free flow of traffic or public safety along the neighbouring highway.

- 17 No piling shall take place until a piling method statement (detailing the depth and type of piling to be undertaken and the methodology by which such piling will be carried out, including measures to prevent and minimise the potential for damage to subsurface sewerage infrastructure, and the programme for the works) has been submitted to and approved in writing by the local planning authority in consultation

with Thames Water. Any piling must be undertaken in accordance with the terms of the approved piling method statement

Reason: The proposed works will be in close proximity to underground sewerage utility infrastructure

- 18 No construction shall take place within 5m of the water main. Information detailing how the developer intends to divert the asset / align the development, so as to prevent the potential for damage to subsurface potable water infrastructure, must be submitted to and approved in writing by the local planning authority in consultation with Thames Water. Any construction must be undertaken in accordance with the terms of the approved information. Unrestricted access must be available at all times for the maintenance and repair of the asset during and after the construction works

Reason: The proposed works will be in close proximity to underground strategic water main, utility infrastructure

- 19 The placement of a satellite dish or television antenna on any external surface of the development is precluded, with the exception of a communal solution for the residential units details of which are to be submitted to the Local Planning Authority for its written approval prior to the first occupation of the development hereby approved. The provision shall be retained as installed thereafter.

Reason: To protect the visual amenity of the locality in accordance with Policies DM1 and DM3 of the Development Management Development Plan Document 2017

- 20 Notwithstanding any provisions to the contrary, no telecommunications apparatus shall be installed on the building without the prior written agreement of the Local Planning Authority.

Reason: In order to control the visual appearance of the development in accordance with Policies DM1 and DM3 of the Development Management Development Plan Document 2017

- 21 The applicant must ensure that the project architect (Archanaeum Architects) continues to be employed as the project architect through the whole of the construction phase for the development except where the architect has ceased trading. The applicant shall not submit any drawings relating to details of the exterior design of the development that are required to be submitted pursuant to conditions of the planning permission unless such drawings have been prepared or overseen and agreed by the project architect.

Reason: In order to retain the design quality of the development in the interest of the visual amenity of the area and consistent with Policy SP11 of the Local Plan 2017.

- 22 All the residential units will be built to Part M4(2) accessible and adaptable dwellings of the Building Regulations 2010 (as amended), unless otherwise agreed in writing in advance with the Local Planning Authority.

Reason: To ensure that the proposed development meets the Council's Standards for the provision for accessible and adaptable dwellings in accordance with Local Plan 2017 Policy SP2 and London Plan Policy D5

- 23 The development hereby approved shall not commence until a Noise Management Plan has been submitted to and approved in writing by the Local Planning Authority. The Plan shall include details of the following: i. External walls of extension acoustic performance details; ii. Glazing acoustic performance details; and iii. Exit doors acoustic performance; The development shall be built in full accordance with the approved details and shall be maintained thereafter.

Reason: To safeguard residential amenity.

- 24 The development hereby approved shall be constructed in accordance with the Energy & Sustainability Strategy by Create Consulting Engineers (dated July 2023) delivering a minimum 80% improvement on carbon emissions over 2021 Building Regulations Part L, high fabric efficiencies, air source heat pumps (ASHPs) and a minimum 36.8 kWp solar photovoltaic (PV) array.

(a) Prior to above ground construction, details of the Energy Strategy shall be submitted to and approved by the Local Planning Authority. This must include:

- Confirmation of how this development will meet the zero-carbon policy requirement in line with the Energy Hierarchy following the GLA Energy Assessment Guidance;
- Confirmation of the necessary fabric efficiencies to achieve a minimum 26% reduction;
- Details to reduce thermal bridging;
- Location, specification and efficiency of the proposed ASHPs (Coefficient of Performance, Seasonal Coefficient of Performance, and the Seasonal Performance Factor), with plans showing the ASHP pipework and noise and visual mitigation measures;
- Specification and efficiency of the proposed Mechanical Ventilation and Heat Recovery (MVHR), with plans showing the rigid MVHR ducting and location of the unit;
- Details of the PV, demonstrating the roof area has been maximised, with the following details: a roof plan; the number, angle, orientation, type, and efficiency level of the PVs; how overheating of the panels will be minimised; their peak

output (kWp); and how the energy will be used on-site before exporting to the grid;

- Specification of any additional equipment installed to reduce carbon emissions.

The development shall be carried out strictly in accordance with the details so approved prior to first operation and shall be maintained and retained for the lifetime of the development. The solar PV array shall be installed with monitoring equipment prior to completion and shall be maintained at least annually thereafter.

(b) Six months following the first occupation of that block, evidence that the solar PV arrays have been installed correctly and are operational, shall be submitted to and approved by the Local Planning Authority, including photographs of the solar array, installer confirmation, an energy generation statement for the period that the solar PV array has been installed, and a Microgeneration Certification Scheme certificate.

(c) Within six months of first occupation, evidence shall be submitted to the Local Planning Authority that the development has been registered on the GLA's Be Seen energy monitoring platform.

Reason: To ensure the development reduces its impact on climate change by reducing carbon emissions on site in compliance with the Energy Hierarchy, and in line with London Plan (2021) Policy SI2, and Local Plan (2017) Policies SP4 and DM22.

25 Prior to the commencement of any works to retrofit the existing building, an Energy Strategy shall be submitted to and approved in writing by the Local Planning Authority. This strategy shall:

- Set out how the development will aim for PAS 2035:2019 & 2030:2017 compliance, with all documentation lodged on the Trustmark data warehouse as appropriate
- Set out how it will reduce the development's carbon emissions prioritising improvements to the fabric, using SAP or Passive House Planning Package calculations;
- Set out the existing air tightness level (measured), and the air tightness strategy on how and where air tightness will be improved to a maximum of 3 m³/m²h @ 50Pa;
- Set out a detailed strategy to reduce thermal bridging, reducing risks of condensation and heat loss, with calculations of the proposed thermal bridge heat loss factors;
- Confirm details of what materials and thicknesses of insulation will be used and where, showing on detailed plans and sections; how the fenestration will be improved (preference for double or triple glazing in existing timber frames);

- Provide existing measured space heating demand (kWh/m²/year) and energy use (kWh/year) and set out the modelled space heating demand for the development (kWh/m²/year).

Reason: To ensure the development reduces its impact on climate change by reducing carbon emissions on site in compliance with the Energy Hierarchy, and in line with London Plan (2021) Policy SI2, and Local Plan (2017) Policies SP4 and DM22.

- 26 No development shall take place beyond the superstructure of the development until a detailed scheme for energy monitoring has been submitted to and approved in writing by the Local Planning Authority. The details shall include details of suitable automatic meter reading devices for the monitoring of energy use and renewable/ low carbon energy generation. The monitoring mechanisms approved in the monitoring strategy shall be made available for use prior to the first occupation of each building and the monitored data for each block shall be submitted to the Local Planning Authority, at daily intervals for a period of 5 years from final completion.

Within six months of first occupation of any dwellings, evidence shall be submitted in writing to the Local Planning Authority that the development has been registered on the GLA's Be Seen energy monitoring platform.

REASON: To ensure the development can comply with the Energy Hierarchy in line with London Plan 2021 Policy SI 2 and Local Plan Policy SP4 before construction works prohibit compliance.

- 27 Prior to the above ground commencement of the development, an updated Overheating Report shall be submitted to and approved by the Local Planning Authority to confirm the overheating mitigation strategy in the Overheating Assessment prepared by Create Consulting Engineers (dated July 2023) that has been approved in principle.

This report shall include:

- Updated modelling of units modelled based on CIBSE TM59, using the CIBSE TM49 London Weather Centre files for the DSY1-3 (2020s) and DSY1 2050s and 2080s, high emissions, 50% percentile;
- Confirmation on which windows the external shutters will be installed;
- Demonstrating the mandatory pass for DSY1 2020s can be achieved following the Cooling Hierarchy with external shutters and in compliance with Building Regulations Part O, demonstrating that any risk of crime, noise and air quality issues are mitigated appropriately evidenced by the proposed location and specification of measures;

- Modelling of mitigation measures required to pass future weather files, clearly setting out which measures will be delivered before occupation and which measures will form part of the retrofit plan;
- Confirmation that the retrofit measures can be integrated within the design (e.g., if there is space for pipework to allow the retrofitting of cooling and ventilation equipment), setting out mitigation measures in line with the Cooling Hierarchy;
- Confirmation who will be responsible to mitigate the overheating risk once the development is occupied.

(b) Prior to first occupation of the development, details of external blinds/shutters to all habitable rooms must be submitted for approval by the local planning authority. This should include the fixing mechanism, specification of the shutters, shading coefficient, etc. Occupiers must retain internal blinds for the lifetime of the development, or replace the blinds with equivalent or better shading coefficient specifications.

(c) Prior to first occupation, the development must be built in accordance with the approved overheating measures and retained thereafter for the lifetime of the development:

- External roller shutters;
- MVHR with extract fans;
- Glazing – u-value of 1.2 W/m²K, g-value of 0.25 (except north-facing façade with a g-value of 0.52);
- Hot water pipes insulated to high standards;
- Any further mitigation measures as approved by or superseded by the latest approved Overheating Strategy.

REASON: In the interest of reducing the impacts of climate change, to enable the Local Planning Authority to assess overheating risk and to ensure that any necessary mitigation measures are implemented prior to construction, and maintained, in accordance with London Plan (2021) Policy S14 and Local Plan (2017) Policies SP4 and DM21.

- 28 Prior to first occupation of the development, a Building User Guide for new residential occupants shall be submitted in writing to and for approval by the Local Planning Authority. The Building User Guide will advise residents how to operate their property during a heatwave, setting out a cooling hierarchy in accordance with London Plan (2021) Policy S14 with passive measures being considered ahead of cooling systems for different heatwave scenarios. The Building User Guide should be easy to understand, and will be issued to any residential occupants before they move in, and should be kept online for residents to refer to easily.

Reason: In the interest of reducing the impacts of climate change and mitigation of overheating risk, in accordance with London Plan (2021) Policy S14, and Local Plan (2017) Policies SP4 and DM21.

(a) Prior to the above ground commencement of development, details of the living roofs and/or living wall must be submitted to and approved in writing by the Local Planning Authority. Living roofs must be planted with flowering species that provide amenity and biodiversity value at different times of year. Plants must be grown and sourced from the UK and all soils and compost used must be peat-free, to reduce the impact on climate change. The submission shall include:

i) A roof plan identifying where the living roofs will be located, and a ground floor plan identifying where the living walls will be rooted in the ground, if any;

ii) A section demonstrating settled substrate levels of no less than 120mm for extensive living roofs (varying depths of 120-180mm), and no less than 250mm for intensive living roofs (including planters on amenity roof terraces);

iii) Roof plans annotating details of the substrate: showing at least two substrate types across the roofs, annotating contours of the varying depths of substrate

iv) Details of the proposed type of invertebrate habitat structures with a minimum of one feature per 30m² of living roof: substrate mounds and 0.5m high sandy piles in areas with the greatest structural support to provide a variation in habitat; semi-buried log piles / flat stones for invertebrates with a minimum footprint of 1m², rope coils, pebble mounds of water trays;

v) Details on the range and seed spread of native species of (wild)flowers and herbs (minimum 10g/m²) and density of plug plants planted (minimum 20/m² with root ball of plugs 25cm³) to benefit native wildlife, suitable for the amount of direct sunshine/shading of the different living roof spaces. The living roofs will not rely on one species of plant life such as Sedum (which are not native);

vi) Roof plans and sections showing the relationship between the living roof areas and photovoltaic array; and

vii) Management and maintenance plan, including frequency of watering arrangements.

viii) A section showing the build-up of the blue roofs and confirmation of the water attenuation properties, and feasibility of collecting the rainwater and using this on site;

(b) Prior to the occupation of 90% of the dwellings, evidence must be submitted to and approved by the Local Planning Authority that the living roofs have been delivered in line with the details set out in point (a). This evidence shall include photographs demonstrating the measured depth of substrate, planting and biodiversity measures. If the Local Planning Authority finds that the living roofs have not been delivered to the approved standards, the applicant shall rectify this to ensure it complies with the condition. The living roofs shall be retained thereafter for the lifetime of the development in accordance with the approved management arrangements.

Reason: To ensure that the development provides the maximum provision towards the creation of habitats for biodiversity and supports the water retention on site during rainfall. In accordance with London Plan (2021) Policies G1, G5, G6, SI1 and SI2 and Local Plan (2017) Policies SP4, SP5, SP11 and SP13.

- 30 (a) Prior to the commencement of development, details of ecological enhancement measures and ecological protection measures shall be submitted to and approved in writing by the Council. This shall detail the biodiversity net gain, plans showing the proposed location of ecological enhancement measures, a sensitive lighting scheme, justification for the location and type of enhancement measures by a qualified ecologist, and how the development will support and protect local wildlife and natural habitats.

(b) Prior to the first occupation of development, photographic evidence and a post-development ecological field survey and impact assessment shall be submitted to and approved by the Local Planning Authority to demonstrate the delivery of the ecological enhancement and protection measures is in accordance with the approved measures and in accordance with CIEEM standards.

Development shall accord with the details as approved and retained for the lifetime of the development.

Reason: To ensure that the development provides the maximum provision towards the creation of habitats for biodiversity and the mitigation and adaptation of climate change. In accordance with London Plan (2021) Policies G1, G5, G6, SI1 and SI2 and Local Plan (2017) Policies SP4, SP5, SP11 and SP13.

- 31 No dwellinghouse shall be occupied until details of the location of a water butt of at least 120L internal capacity to be installed to intercept rainwater draining from the roof of each dwelling has been submitted to and approved in writing by the Local Planning Authority and subsequently provided at each dwelling. The approved facilities shall be retained.

Reason: To reduce the risk of flooding and demand for water, increase the level of sustainability of the development and in line with Haringey Local Plan Policy SP5, DM21, DM24 and DM25.

INFORMATIVE : In dealing with this application, Haringey Council has implemented the requirements of the National Planning Policy Framework and of the Town and Country Planning (Development Management Procedure) (England) (Amendment No.2) Order 2012 to foster the delivery of sustainable development in a positive and proactive manner

INFORMATIVE : CIL Based on the information given on the plans, the Mayoral CIL charge will be £99,600.65 (1543 sqm x £64.55) and the Haringey CIL charge will

be £607,355.66 (1,543sqm x £393.62). This will be collected by Haringey after/should the scheme is/be implemented and could be subject to surcharges for failure to assume liability, for failure to submit a commencement notice and/or for late payment, and subject to indexation in line with the construction costs index. An informative will be attached advising the applicant of this charge.

INFORMATIVE: Hours of Construction Work: The applicant is advised that under the Control of Pollution Act 1974, construction work which will be audible at the site boundary will be restricted to the following hours:

- 8.00am - 6.00pm Monday to Friday
- 8.00am - 1.00pm Saturday
- and not at all on Sundays and Bank Holidays.

INFORMATIVE: Party Wall Act: The applicant's attention is drawn to the Party Wall Act 1996 which sets out requirements for notice to be given to relevant adjoining owners of intended works on a shared wall, on a boundary or if excavations are to be carried out near a neighbouring building.

INFORMATIVE: The new development will require numbering. The applicant should contact the Local Land Charges at least six weeks before the development is occupied (tel. 020 8489 5573) to arrange for the allocation of a suitable address.

INFORMATIVE: The London Fire Brigade strongly recommends that sprinklers are considered for new developments and major alterations to existing premises, particularly where the proposals relate to schools and care homes. Sprinkler systems installed in buildings can significantly reduce the damage caused by fire and the consequential cost to businesses and housing providers, and can reduce the risk to life. The Brigade opinion is that there are opportunities for developers and building owners to install sprinkler systems in order to save money, save property and protect the lives of occupier.

INFORMATIVE: Thames Water will aim to provide customers with a minimum pressure of 10m head (approx. 1 bar) and a flow rate of 9 litres/minute at the point where it leaves Thames Waters pipes. The developer should take account of this minimum pressure in the design of the proposed development

INFORMATIVE: A Groundwater Risk Management Permit from Thames Water will be required for discharging groundwater into a public sewer. Any discharge made without a permit is deemed illegal and may result in prosecution under the provisions of the Water Industry Act 1991. We would expect the developer to demonstrate what measures he will undertake to minimise groundwater discharges into the public sewer. Permit enquiries should be directed to Thames Water's Risk Management Team by telephoning 020 3577 9483 or by emailing trade.effluent@thameswater.co.uk . Application forms should be completed on line

via www.thameswater.co.uk. Please refer to the Wholesale; Business customers; Groundwater discharges section.

INFORMATIVE: The proposed development is located within 15m of Thames Waters underground assets, as such the development could cause the assets to fail if appropriate measures are not taken. Please read our guide 'working near our assets' to ensure your workings are in line with the necessary processes you need to follow if you're considering working above or near our pipes or other structures. <https://www.thameswater.co.uk/developers/larger-scaleddevelopments/planning-your-development/working-near-our-pipes> Should you require further information please contact Thames Water. Email: developer.services@thameswater.co.uk

INFORMATIVE: Prior to the demolition or construction on the existing building and land, an asbestos survey should be carried out to identify the location and type of asbestos containing materials. Any asbestos containing materials must be removed and disposed of in accordance with the correct procedure prior to any demolition or construction works carried out.

INFORMATIVE: The applicant must seek the continual advice of the Metropolitan Police Service Designing Out Crime Officers (DOCOs) to achieve accreditation. The services of MPS DOCOs are available free of charge and can be contacted via docomailbox.ne@met.police.uk.

INFORMATIVE: Tottenham Lane supports bus routes 41, N41 and N91. In the event that implementation of the development impacts users of those services such as alighting or accessing bus stops or requires the temporary re-routing of bus services or other such arrangements, these must be agreed with TfL before the work. All vehicles associated with the development must only park / stop at permitted locations and within the time periods permitted by existing on-street restrictions.

INFORMATIVE: It is vital that construction work associated with the development is carried out in accordance with best practice, minimising impact upon vulnerable road users including cyclists on surrounding streets. TfL strongly encourages the use of construction contractors who are registered on the Fleet Operator Recognition Scheme and adhere to the CLOCS standard. Contractor vehicles should include side-bars, blind spot mirrors and detection equipment to reduce the risk and impact of collisions with other road users and pedestrians on the capital's roads. Further information can be found here: <https://constructionlogistics.org.uk/>.
