- 6.4. The Pension Fund’s global listed equities and active strategies provided positive returns over the quarter, despite the volatility that persisted in financial markets. The prices of UK Index Linked Gilts continued to fall, primarily due to their duration, while equity markets were boosted by anticipated developments in artificial intelligence (AI). Performance across the rest of the portfolio continued to be relatively mixed.
- 6.5. A detailed breakdown of pension fund’s investment performance can be found in the Fund Strategy Report for the quarter ending 30 June 2023, appended to this report as Confidential Appendix 2.

Investment Asset Allocation

- 6.6. The Pension Fund’s strategic asset allocation over the last four quarters to 31 March 2023 is shown in the chart below.

Asset allocation as at 30 June 2023

- 6.7. The Pension Fund current asset allocation, compared to the strategic asset allocation is shown on the following tables below.

Liquid assets	Jun-23 £m	Strategic Asset Allocation	Current Asset Allocation	Variance	Allowable Ranges
Listed equities	869	47.5%	51.0%	3.5%	+/- 10.0%
Multi-asset credit	144	10.0%	8.4%	(1.5%)	+/- 3.0%
Multi-asset absolute return	140	7.5%	8.2%	0.7%	+/- 3.0%
Index linked gilts	92	7.0%	5.4%	(1.6%)	+/- 3.0%
Cash	13	0.0%	0.8%	0.8%	

- 6.8. The Pension Fund determines liquid assets as any investments that can be traded within a month such as listed equities and fixed income securities. The Pension Fund has established acceptable ranges for rebalancing these strategies in the event that they deviate from the strategic asset allocation.

Illiquid assets	Jun-23 £m	Strategic Asset Allocation	Current Asset Allocation	Variance
Property	211	15.5%	12.4%	(3.1%)
Private equity	133	5.0%	7.8%	2.8%
Renewable infrastructure	67	5.0%	4.0%	(1.0%)
Infrastructure debt	34	2.5%	2.0%	(0.5%)

- 6.9. No formal tolerance range has been established for property, private equity, and renewable infrastructure as these asset classes are illiquid. Some of these asset classes are still in the funding stage, and it anticipated that the allocation to them will increase over time to be in line with the strategic asset allocation.
- 6.10. As of 30 June 2023, all asset classes were within the acceptable ranges. Therefore, no rebalancing is required.

London Collective Investment Vehicle (LCIV) Update

- 6.11. Haringey Pension Fund, along with all the London Borough funds, is a member of the London Collective Investment Vehicle (LCIV), of the asset pools that were established following the government guidance issued in November 2015. As of 30 June 2023, the Pension Fund has approximately 76% of its assets invested with the pool, with approximately 20% invested in funds managed directly by the pooling company.

Funding Position Update

- 6.12. The funding level is the ratio of the market value of assets to the projected future benefit payments, also known as fund liabilities. At 31 March 2022, the Pension Fund had a funding level of 113%. This indicates that the Pension Fund's investment assets were more than sufficient to cover all the pension benefits accrued by that date, based on the underlying actuarial assumptions.
- 6.13. Hymans Robertson, the Pension Fund's actuary, regularly calculates an indicative funding position update using the latest actuarial assumptions. At 30 June 2023, the updated funding level position was 143%. A detailed breakdown of the Pension Fund's funding position has been included as Confidential Appendix 3 to this report.
