Fortis Green	Consent under Tree Preservation Orders	HGY/2024/1922	Approve with Conditions	13/09/2024	8 Southern Road, Hornsey, London, N2 9LE	Works to tree protected by a TPO. The tree is a mature oak situated in the rear garden of the property. The tree has been managed by crown reduction historically in accordance with granted planning applications HGY/2015/0588 and HGY/2019/2877 (for example) and the proposed works are a repeat of those previously permitted. A site visit was not previously deemed necessary in order to determine the appropriateness of the proposed works. Proposal: T1: Oak: Full crown reduction by 2-3m up to the previous pollard points as part of regular maintenance and to keep the tree at a size suitable for it's location. Issues: Due to the presence of other trees within the back-garden areas and the rear garden setting, the pruning of the tree will have minimal/neutral impact on the public amenity. Although some of the tree's crown will be removed, resulting in temporary canopy cover loss, the proposed tree works are consistent with previous tree management and comply with good arboricultural management. All works to confirm with BS3998 standards.	Daniel Monk

Fortis Green	Consent under Tree Preservation Orders	HGY/2024/1607	Refuse	23/09/2024	41 Sussex Gardens, Hornsey, London, N6 4LY	Works to tree protected by a TPO. T1: Silver birch (14m): Crown reduce by 1-1.5m. The silver birch is leaning on a bank with an extensive roots system at the surface. A 1m reduction is required to keep the tree at a size suitable for its location and to reduce the risk of failure by having less exposed crown after works are completed. Minor pruning is more appropriate than a heavier reduction that may be required in time if left to grow creating larger wounds which is not suitable for the species. This work will be carried out with hand saws and with the use of a MEWP to ensure a sympathetic reduction by removing smaller diameter branches.	Daniel Monk
