

## Appendix 2

<sup>1</sup> The potential child and parent risk factors identified at assessment identified in the CIN census are as follows in the table below (multiple factors can be selected):

### Parental/child factors at assessment

Parental/child factors will be identified through assessment. Each local area will have a framework for assessment developed with reference to *Managing Individual Cases: the Framework for the Assessment of Children in Need and their Families*. This sets out the principles that underpin all work with children in need and in particular the three domains of the conceptual framework: child's development needs; parenting capacity; family and environmental factors.
