The matrix is intended to provide a guide to the relevance of the proposed investments of the BCF to the delivery of key outcomes, as expressed by the metrics attached to Haringey's Integration Plan. It will be noted that all proposed investments, with the exception of the investment in Winterbourne response, are cross-cutting, contributing to the delivery of more than one outcome. However, this investment will contribute to reducing the permanent admission of younger adults with learning disabilities to institutional care and support them to live independently in the community.
