

My question to my tenants as follows:

Hi.

Sorry to bother you, but I would like to know if in the last month or so you can confirm if music and noise from the restaurant downstairs in the outside garden area has continued after 9:30 in the evening or later on Friday and Saturday .

I am attending a licensing hearing on Tuesday and would like, if you would not mind, as much information as possible as to times and dates of the disturbances.

I have already made and in depth objection to the late night disturbances and now need to finalise this matter.

I will be reading this out at the appeal. Can you please contact me via email, preferable, with your names and addressed on the message to:

[REDACTED]

I can then forward these onto the planning officer as evidence . times and dates of the disturbances . I will be reading this out at the appeal. Thank you very much.

Hi Laki.

Yes I can confirm this. It's really loud, especially at the weekends. Was going to mention this to you, glad someone else has too. Will send you an email.

Many thanks Fiona

Hi lucky!

I do not have dates but the garden is open even after 11pm very often.

I have called a council myself 3 times and restaurant itself.

Specially weekends! But the worst thing now is the grill smell because of the nice weather they make it more often and it's just a nightmare. And I think that sometimes they must to burn rubbish behind the fence. I see sometimes a smoke coming from behind of the fence. Probably that's why we had that fire another day

From: [REDACTED]) You moved this message to its current location.

Dear Laki,

The noise is generally Thursday- Sunday and is still going on when I get home from work so anytime from 12-1.30am. There's usually lots of people inside and outside of the restaurant and outside our front door. I know this Saturday I got back at just after 1 am and it was still going strong!

In the last month I haven't noticed a difference in the sound- it's always been loud until really late for those four days.

Hope this helps

Iona
