

Lordship Lane:

Developing World Class Primary Care Services

Haringey TPCT's Vision for Primary Care

Consistently high quality, responsive primary and community services, which improve the health of our local population, reducing existing health inequalities and maximising independence.

Lordship Lane's role in delivering this vision

- Centre has been purpose built to allow for the provision of a wide range of primary and community services from a single site.
- It will also provide the 'hub' for a network of service providers, offering services to around 50,000 people, from a range of sites in the local area, as well as directly to the patient at home.

Services provided from Lordship Lane

Current:

- Physiotherapy
- Speech & Language Therapy
- District Nursing
- Health Visiting
- School Nurses
- Community Matrons
- Podiatry & Biomechanics
- Continence & Enuresis services
- Ultrasound
- Echocardiograms
- London Ambulance Service standby point

Services to be provided from Lordship Lane

Planned:

- GP practice (Morris House Group Practice)
- Enhanced primary care services
 - e.g. dermatology, minor surgery, IUCD fitting
- Integrated management of Long Term Conditions
 - e.g. diabetes; hypertension and coronary heart disease
- Family Planning
- Pulmonary Rehabilitation services

Potential:

- Dental
- Urgent primary care 'walk-in' services
- Social services
- Welfare Rights
- Phlebotomy
- Expanded range of diagnostic services
- Consultant outpatient 'outreach' clinics

Lordship Lane as a 'hub'

In addition to be a major centre from which local people will be able to access a range of services Lordship Lane will also provide:

- a base from which services are provided to patients in their homes (e.g District Nursing; Health Visiting etc.)
- the central point for a network of sites providing services to the population of North-East Haringey (e.g. Somerset Gardens clinic, Broadwater Farm Health centre)
- linking with local leisure services

Lordship Lane: a new way of working

Extending access to services:

In time it is expected that Lordship Lane will offer both routine and urgent care services to local people for 12 hours per day, 6 days a week.

Lordship Lane: a new way of working

The key to the success of Lordship Lane will be collaboration:

- Between GP led primary care services and PCT led community services – possibly evolving to form an integrated multidisciplinary team
- Between Lordship Lane and other local sites (e.g. local practices; North Middlesex Hospital)
- Between health, social care and other services that effect local peoples health
- Between the PCT and the London Borough of Haringey, especially in relation to issues relating to transport and future local developments
