<p>The commercial waste market is volatile with much competition between Veolia Haringey and smaller waste contractors who don't have such large overheads.            In order for Veolia Haringey to remain competitive they need to be able to offer discounts on bulk sales, price matching to retain customers.</p> <p>An auditable process for discounts and price matching is being developed to ensure financial probity.            Due to competition amongst private waste contractors - it is thought that any increase higher than 1.5% inflation would have a detrimental impact on the market share .</p>
